7. TROUBLESHOOTING

If you encounter any issues with your wardrobe, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Sliding doors do not move smoothly or 'wobble'.	Tracks are dirty or obstructed; rollers are misaligned; fittings are loose.	Clean tracks of any debris. Check and adjust door rollers. Ensure all assembly fittings are tightened.
Drawers are stiff or difficult to open/close.	Drawer runners are misaligned or dirty; drawer is overloaded.	Check drawer runner alignment and clean if necessary. Reduce weight in the drawer.
Wardrobe feels unstable.	Fittings are loose; wardrobe not wall-mounted; uneven floor.	Ensure all assembly fittings are securely tightened. Confirm wardrobe is properly wall-mounted. Use shims if the floor is uneven.
