- **Sleeping Areas:** The upper and lower bunks accommodate standard twin-size mattresses. Ensure mattress thickness does not exceed 6 inches for the upper bunk to maintain guardrail effectiveness.
- **Storage Drawers:** Utilize the two under-bed drawers for storing clothes, bedding, or other items. Pull them out gently using the integrated handles.

- **Ladder Use:** Always use the ladder to access the upper bunk. Ensure a firm grip and stable footing when climbing or descending.

MAINTENANCE

Regular maintenance will help preserve the appearance and structural integrity of your bunk bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that may damage the finish.
- **Fasteners:** Periodically check all bolts, screws, and other fasteners to ensure they are tight. Retighten as necessary to maintain stability and prevent creaking.
- **Wood Care:** Protect the wood from direct sunlight and extreme temperature changes to prevent warping or fading.

TROUBLESHOOTING

If you encounter issues with your bunk bed, refer to the following common solutions.

- **Difficulty during Assembly:** If parts do not fit or alignment is difficult, re-check the assembly manual diagrams. Ensure you are using the correct parts for each step and that they are oriented correctly. Sometimes, disassembling a small section and re-aligning can resolve the issue.
- **Bed Creaks:** Creaking often indicates loose fasteners. Systematically check and tighten all bolts and screws throughout the bed frame, especially at joints.
- **Missing Parts or Damaged Components:** If you find any missing parts or damaged components upon unboxing, do not proceed with assembly. Contact customer service immediately for assistance.
