

YAMAZAKI 2061

Yamazaki Industries Tower Magnetic Steel Bar

MODEL: 2061 - INSTRUCTION MANUAL

1. Introduction

Thank you for purchasing the Yamazaki Industries Tower Magnetic Steel Bar, Model 2061. This steel bar is designed for convenient wall storage, allowing you to attach items using magnets or hang them with the included hooks. It is compatible with gypsum board walls, offering an easy installation solution with minimal wall damage. Please read this manual thoroughly before installation and use to ensure proper and safe operation.

2. Package Contents

Please verify that all components are present in the package:

- 1 x Tower Magnetic Steel Bar (Black)
- 2 x Gypsum Board Tweezers (Pins)
- 2 x Wood Screws
- 4 x Hooks

3. Safety Information

To ensure safe use of this product, please observe the following precautions:

- **Maximum Weight Capacity:** Do not exceed a total weight of **2 kilograms (approximately 4.4 lbs)** on the steel bar. Overloading can cause the bar to detach from the wall, leading to injury or damage.
- **Proper Installation:** Ensure the bar is securely installed according to the instructions. Improper installation can lead to instability.
- **Wall Type:** This product is designed for gypsum board walls using the included pins, or wood studs using the included screws. Do not install on unsuitable surfaces such as thin plasterboard, concrete,

or tile without appropriate anchors (not included).

- **Children and Pets:** Keep small parts (screws, pins, hooks) out of reach of children and pets to prevent choking hazards.
- **Sharp Edges:** Handle the steel bar and installation tools with care to avoid injury from sharp edges.
- **Regular Checks:** Periodically check the stability of the installed bar and the tightness of the fasteners.

4. Setup and Installation

The Yamazaki Tower Magnetic Steel Bar can be installed on gypsum board walls using the provided pins or on wood studs using the provided screws. Choose the appropriate method for your wall type.

4.1. Tools Required (Not Included)

- Pencil for marking
- Level
- Hammer (for gypsum board pins)
- Screwdriver (for wood screws)

4.2. Installation Steps

1. **Determine Mounting Location:** Choose a suitable location on your wall. Use a level to ensure the bar will be installed horizontally. Mark the desired positions for the mounting holes on the wall.

2. Install Mounting Hardware:

- *For Gypsum Board Walls:* Align the steel bar with your marks. Insert the gypsum board pins (tweezers) into the designated holes on the bar and gently tap them into the gypsum board using a hammer until secure. The pins are designed to create minimal, inconspicuous holes.

- *For Wood Studs:* If installing into wood studs, use the provided wood screws. Drive the screws through the mounting holes on the bar and into the wood stud using a screwdriver until the bar is firmly attached to the wall.
3. **Verify Stability:** Gently pull on the installed bar to ensure it is firmly secured to the wall and does not wobble. If it feels loose, re-check the installation steps.
 4. **Attach Hooks (Optional):** The included hooks can be slid onto the top edge of the steel bar. Position them as desired for hanging items.

5. Operating Instructions

The Yamazaki Tower Magnetic Steel Bar offers versatile storage options:

- **Magnetic Attachment:** Use your own magnets to attach prints, photos, notes, or other lightweight magnetic items directly to the steel bar. The bar allows for horizontal display of multiple items.

6. Maintenance

The Yamazaki Tower Magnetic Steel Bar is made of alloy steel with a rust-resistant finish, ensuring durability and easy care.

- **Cleaning:** Wipe the surface with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these may damage the finish.
- **Dusting:** Regularly dust the bar to prevent accumulation.
- **Inspection:** Periodically inspect the bar and its mounting points for any signs of wear, damage, or loosening. Tighten screws or re-secure pins if necessary.

7. Troubleshooting

If you encounter any issues with your magnetic steel bar, please refer to the following common problems and solutions:

- **Problem:** The steel bar feels loose or unstable after installation.
Solution: Re-check the installation steps. Ensure that the gypsum board pins are fully inserted and secure, or that the wood screws are tightly fastened into a stud. Do not overload the bar beyond its 2 kg weight capacity.
- **Problem:** Items are not sticking to the magnetic bar.
Solution: Ensure that the items you are trying to attach are magnetic or have magnets attached to them. The bar itself is magnetic, but items must also be magnetic to adhere.
- **Problem:** Hooks are sliding or falling off.
Solution: Ensure the hooks are correctly placed over the top edge of the bar. Avoid hanging excessively heavy items on individual hooks, distributing weight evenly.

8. Specifications

Brand	YAMAZAKI
Model Number	2061
Material	Alloy Steel
Color	Black
Product Dimensions (D x W x H)	0.79" x 23.62" x 1.18" (2cm x 60cm x 3cm)
