GIOTOHUN 3.2L Cat Water Fountain Instruction Manual

Model: H1-pluspro

INTRODUCTION

Thank you for choosing the GIOTOHUN 3.2L Cat Water Fountain. This product is designed to provide your pet with a continuous supply of fresh, filtered water, promoting their health and well-being. Please read this manual carefully before use to ensure proper operation and maintenance.

GIOTOHUN's philosophy is to create a smarter life for pets and their owners. This fountain encourages pets to drink more water, which is vital for their kidney health and overall hydration.

PRODUCT COMPONENTS

The GIOTOHUN 3.2L Cat Water Fountain consists of the following main components:

- Water Tank (3.2L capacity)

- Top Tray with Faucet
- Water Pump
- Filter Element (Activated Carbon + High-Density Cotton)
- Sponge Filters
- Power Adapter (USB cable)

Mimic the flow of water from a faucet

Water circulation, the faucet is more likely to attract cats to drink water

SETUP INSTRUCTIONS

1. **Prepare the Filter:** Before first use, immerse the carbon filter in water for 3-5 minutes to remove any

loose carbon dust. Rinse the sponge filters as well.

2. **Assemble the Pump:** Ensure the pump is clean. Place the sponge filter around the pump.
3. **Place the Filter:** Insert the prepared filter element into the designated slot in the top tray.
4. **Fill the Water Tank:** Fill the water tank with clean water up to the 'MAX' line. Do not overfill. The translucent tank allows you to monitor the water level easily.
5. **Assemble the Fountain:** Place the top tray onto the water tank, ensuring it is securely seated. Connect the faucet if desired.
6. **Connect Power:** Connect the USB power cable to the pump and plug the adapter into a power outlet. The fountain will start operating, and the LED light will illuminate.

Clean Water at All Times

Water circulation filtration keeps your cat away from urinary tract diseases

OPERATING INSTRUCTIONS

The GIOTOHUN 3.2L Cat Water Fountain is designed for continuous operation, providing fresh water for your pet.

- **Capacity:** The fountain has a 3.2L (108oz) capacity, which can provide 7-10 days of drinking water for an average pet, reducing the need for frequent refills.
- **Water Flow Modes:** The fountain offers two water flow modes: a faucet mode and a bubbling fountain mode. These modes mimic natural water sources, encouraging pets to drink more.
- **Silent Operation:** The ultra-quiet pump operates at less than 40dB, ensuring a peaceful environment for both you and your pet.
- **LED Lighting:** An integrated LED light illuminates the water, making it easy to monitor the water level, especially in low light conditions. It also helps attract your pet to drink at night.
- **Energy Efficiency:** The 1.5W low-power pump consumes minimal electricity, approximately 1 degree per month.

3.L/108oz Large Capacity

3200ml

Drinking Water

8 Days*

For a 5kg adult cat

MAINTENANCE

Regular cleaning and filter replacement are crucial for maintaining water quality and extending the life of your fountain.

Filtration System

The fountain utilizes a triple filtration system:

- **Filter Cotton:** Removes hair and debris.
- **Activated Carbon:** Removes odors and impurities.

- **Sponge Filters:** Provides additional mechanical filtration and protects the pump.

Filter Replacement: Replace the carbon filter every 2-4 weeks to ensure optimal water quality. Sponge filters should also be cleaned or replaced regularly.

Quick to **install** and **clean**

Detachable design for easy assembly and cleaning.

Different Filters Combinations for Your Choice

Replacement filters and sponges for the GIOTOHUN water fountain.

Cleaning the Fountain

The fountain features a detachable design for easy cleaning. It is recommended to clean the entire fountain, including the water tank and top tray, every 1-2 weeks.

Cleaning the Pump

To prolong the pump's lifespan and ensure quiet operation, clean the pump every 1-2 weeks. Follow these steps:

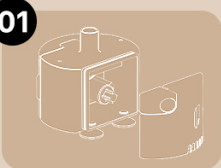

1. Remove the pump cover.
2. Remove the impeller.

3. Clean all components with a small brush, removing any hair or debris.

Sorgente vivente, protezione a portata di mano

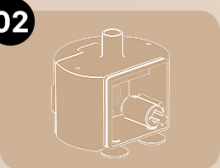

Sistema di circolazione dell'acqua, tasso di utilizzo >90%, riduzione degli sprechi.

01

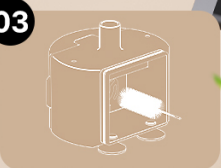

(1) Rimuovere il coperchio della pompa e la calotta della girante.

02

(2) Rimuovere la girante.

03

(3) Pulire i componenti con la spazzola per la pulizia.

Nota: per una maggiore durata della pompa, si consiglia di pulirla ogni 1-2 settimane.

Instructions for cleaning the water pump to ensure longevity and performance.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No water flow / Weak flow	Low water level, clogged pump, dirty filter.	Refill water to MAX line. Clean the pump and impeller. Replace the filter.
Excessive noise	Low water level, dirty pump/impeller, pump not properly seated.	Refill water. Clean the pump thoroughly. Ensure the pump is correctly positioned in its housing.
LED light not working	Power issue, LED malfunction.	Check power connection. If problem persists, contact customer support.
Water appears dirty or has odor	Filter needs replacement, fountain needs cleaning.	Replace the carbon filter. Thoroughly clean all fountain components.
