3. SETUP AND FIRST USE

Unpacking:

1. Carefully remove the waffle maker and all packaging materials.
2. Remove any promotional labels or stickers.
3. Wipe the exterior of the appliance with a damp cloth.
4. Wipe the non-stick cooking plates with a damp cloth or sponge. Do not use abrasive cleaners or scouring pads.
5. Dry thoroughly.

Initial Heat-Up:

Before using for the first time, it is recommended to perform an initial heat-up cycle to burn off any manufacturing oils.

1. Place the waffle maker on a stable, heat-resistant surface.
2. Plug the appliance into a standard 120V AC electrical outlet. The indicator light will illuminate, signaling that the unit is heating.
3. Allow the waffle maker to heat for approximately 5-10 minutes, or until the indicator light signals it is ready (if applicable). A slight odor or smoke may be present during this initial use; this is normal.
4. Unplug the appliance and allow it to cool completely.
5. Wipe the cooking plates again with a damp cloth. The appliance is now ready for use.

4. OPERATING INSTRUCTIONS

Follow these steps to bake delicious mini waffles:

1. **Prepare Batter:** Prepare your favorite waffle batter.
2. **Preheat:** Plug the waffle maker into a 120V AC outlet. The indicator light will turn on, indicating the unit is heating. Wait until the indicator light signals that the waffle maker has reached the optimal cooking temperature.
3. **Grease (Optional):** Although the cooking plates are non-stick, you may lightly brush or spray the cooking surfaces with a small amount of cooking oil or butter for extra crispness and flavor, especially for the first batch.
4. **Add Batter:** Carefully pour approximately 2-3 tablespoons of batter into the center of each waffle mold. Do not overfill, as batter may overflow when the lid is closed.
5. **Close Lid:** Gently close the lid. Do not force it shut.
6. **Cook:** Allow the waffles to cook for approximately 3-5 minutes, or until they are golden brown and crisp. Cooking time may vary depending on the batter consistency and desired crispness. The indicator light may cycle on and off during cooking to maintain temperature.
7. **Remove Waffles:** Once cooked, open the lid and carefully remove the waffles using a heat-resistant plastic or wooden utensil. Do not use metal utensils, as they can damage the non-stick coating.
8. **Repeat:** Close the lid and allow the waffle maker to reheat for a minute or two before baking additional batches.
9. **Serve:** Serve your mini waffles immediately with your favorite toppings.

5. CLEANING AND MAINTENANCE

Proper cleaning and maintenance will ensure the longevity and optimal performance of your waffle maker.

1. **Unplug and Cool:** Always unplug the waffle maker from the electrical outlet and allow it to cool completely before cleaning.
2. **Remove Excess Batter:** Use a soft brush or paper towel to gently remove any loose batter crumbs from the cooking plates.
3. **Wipe Cooking Plates:** Wipe the non-stick cooking plates with a damp cloth or sponge. For stubborn residue, dampen a cloth with a small amount of cooking oil and gently rub the area, then wipe clean with a fresh damp cloth.
4. **Clean Exterior:** Wipe the exterior of the waffle maker with a damp cloth. Do not use abrasive cleaners or harsh chemicals, as they may damage the finish.
5. **Do Not Immerse:** Never immerse the waffle maker, its cord, or plug in water or any other liquid.

6. **Storage:** Once clean and completely dry, store the waffle maker in a cool, dry place. You may store it upright to save space.

6. TROUBLESHOOTING

If you encounter issues with your waffle maker, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Waffles stick to the plates.	Plates not sufficiently greased; batter contains too much sugar; plates not hot enough.	Lightly grease plates before each use (especially the first batch). Ensure the waffle maker is fully preheated. Reduce sugar in batter if necessary.
Waffles are not cooking evenly.	Waffle maker not fully preheated; batter unevenly distributed.	Allow the waffle maker to fully preheat until the indicator light signals readiness. Distribute batter evenly across all molds.
Indicator light does not turn on.	Appliance not plugged in; power outlet malfunction.	Ensure the waffle maker is securely plugged into a working 120V AC outlet. Test the outlet with another appliance.
Batter overflows.	Too much batter poured into molds.	Reduce the amount of batter. Start with 2 tablespoons per mold and adjust as needed.
