7. MAINTENANCE

To ensure the longevity and optimal performance of your electric fireplace, regular maintenance is recommended:

- **Cleaning:** Dust the exterior surfaces and glass panel with a soft, damp cloth. Avoid abrasive cleaners.
- **Ventilation:** Periodically check the air intake and outlet vents for any obstructions and clear them to maintain proper airflow.
- **Internal Components:** Do not attempt to service internal components. Refer to qualified service personnel if issues arise.

8. TROUBLESHOOTING

If you encounter any issues with your fireplace, refer to the following common troubleshooting steps:

- **No Power:** Ensure the power cord is securely plugged into a working outlet. Check your home's circuit breaker.

- **Remote Not Working:** Replace the batteries in the remote control. Ensure there are no obstructions between the remote and the fireplace sensor.
- **No Heat Output:** Verify that the heating function is activated and the thermostat is set to a temperature higher than the ambient room temperature. Check for blocked vents.
- **Flames Not Displaying:** Ensure the flame effect is turned on via the control panel or remote. Adjust brightness settings.
- **Wi-Fi/App Connectivity Issues:** Ensure your home Wi-Fi network is active and the fireplace is within range. Follow the app's instructions for re-pairing if necessary.
