## RASTAR 59400

# RASTAR 59400 1/18 Porsche 911 RC Car Instruction Manual

Officially Licensed Remote Control Car

## 1. INTRODUCTION

This manual provides instructions for the RASTAR 59400 1/18 scale Porsche 911 Remote Control Car. This product is an officially licensed replica designed for play and display, featuring full functions including forward, reverse, stop, turn left, and turn right. It operates at a low speed suitable for both indoor and outdoor use.

## 2. SETUP

### 2.1 Package Contents

- 1 x RASTAR 1/18 Porsche 911 RC Car

- 1 x Remote Controller

*Note: 5 AA batteries are required (3 for the car, 2 for the controller) and are not included.*

## **2.2 Battery Installation**

### **1. For the RC Car:**

- Locate the battery compartment on the underside of the car.
- Use a screwdriver to open the battery compartment cover.
- Insert 3 AA batteries, ensuring correct polarity (+/-).
- Replace the cover and secure it with the screw.

### **2. For the Remote Controller:**

- Locate the battery compartment on the back of the remote controller.
- Use a screwdriver to open the battery compartment cover.
- Insert 2 AA batteries, ensuring correct polarity (+/-).
- Replace the cover and secure it with the screw.

## 3. OPERATING INSTRUCTIONS

### 3.1 Powering On

- Turn on the power switch located on the underside of the RC car.
- Turn on the power switch on the remote controller. The indicator light on the controller should illuminate.
- The car and controller should automatically pair. If not, turn both off and on again.

## 3.2 Basic Controls

The remote controller features two main control sticks:

- **Left Stick (Forward/Reverse):**
  - Push forward to move the car forward.
  - Pull backward to move the car in reverse.
  - Release to stop the car.
- **Right Stick (Left/Right):**
  - Push left to turn the car left.
  - Push right to turn the car right.
  - Release to drive straight.

## 3.3 Steering Alignment Adjustment

If the car does not drive straight when the steering control is centered, locate the steering trim adjustment on the underside of the car. Turn the knob slightly left or right until the car maintains a straight path.

## 4. MAINTENANCE

### 4.1 Cleaning

- Wipe the car and controller with a soft, dry cloth to remove dust and dirt.
- Avoid using water or chemical cleaners, as these can damage electronic components.

### 4.2 Battery Care

- Always remove batteries from both the car and the controller when not in use for extended periods.
- Do not mix old and new batteries, or different types of batteries.
- Dispose of used batteries responsibly according to local regulations.

### 4.3 Storage

- Store the RC car and controller in a cool, dry place, away from direct sunlight and extreme temperatures.
- Keep the product in its original packaging or a protective container to prevent damage.

## 5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Car does not move or respond.	Low or dead batteries in car or controller. Incorrect battery installation. Power switches off.	Replace batteries in both car and controller. Check battery polarity. Ensure both power switches are ON.
Poor control or short range.	Weak batteries. Interference from other electronic devices. Obstacles blocking signal.	Replace batteries. Move to an area with less interference. Ensure clear line of sight between controller and car.
Car pulls to one side.	Steering alignment is off.	Adjust the steering trim knob on the underside of the car until it drives straight.
