## Clutch CP-BI-5000

# Clutch Pro Portable iPhone Charger User Manual

Model: CP-BI-5000
Brand: Clutch

### Introduction

Welcome to the user manual for your Clutch Pro Portable iPhone Charger. This compact and powerful device is designed to provide reliable power for your iPhone and other compatible devices on the go. Its slim profile and built-in Lightning cable make it an ideal travel companion, ensuring your devices remain powered wherever you are.

### Safety Information

To ensure safe and optimal use of your Clutch Pro Portable iPhone Charger, please adhere to the following safety guidelines:

- Do not expose the charger to extreme temperatures, direct sunlight, or moisture.
- Do not disassemble, modify, or attempt to repair the device.
- Keep out of reach of children.
- Dispose of the charger responsibly according to local regulations.
- Avoid dropping or subjecting the charger to strong impacts.
- Ensure proper ventilation during charging and use.

This image illustrates the safety features of the Clutch Pro charger, including Over-Current Protection, Short-Circuit Protection, Overdischarge Protection, and Temperature Protection, ensuring safe and reliable charging.

## Package Contents

Please verify that all items are present in your package:

- 1 x Clutch Pro Portable iPhone Charger
- 1 x Magnetic Attachment Ring (for non-MagSafe compatible devices/cases)
- 1 x USB Charging Cable (for recharging the power bank)
- User Manual (this document)

## Product Overview

The Clutch Pro Portable iPhone Charger is designed for convenience and efficiency, featuring a sleek, compact form factor and essential functionalities:

- **Built-in Lightning Cable:** Eliminates the need for extra cables, providing an all-in-one charging solution.
- **Magnetic Attachment:** Securely attaches to compatible iPhones and MagSafe cases. An included magnetic ring allows attachment to other models for broader compatibility.
- **LED Battery Indicators:** Four small LED lights clearly indicate the remaining battery level of the power bank.
- **Power Button:** Activates charging and allows for a quick check of the battery status.

## Setup

### Initial Charging of the Clutch Pro

Before first use, it is recommended to fully charge your Clutch Pro portable charger to ensure maximum performance.

1. Locate the USB charging cable provided in the package.
2. Connect the USB-A end of the cable to a compatible USB power adapter (not included) or a computer's USB port.
3. Connect the USB-C end of the cable to the charging port on the Clutch Pro.
4. The LED indicators on the charger will illuminate to show the charging progress. All four LEDs will be solid when the charger is fully charged.
5. A full charge to 5000 mAh typically takes approximately 2 hours.

### Attaching the Magnetic Ring (Optional)

For iPhones or cases without built-in magnetic compatibility, you can use the included magnetic attachment ring to enable secure magnetic connection.

1. Clean the back surface of your phone or case thoroughly to ensure proper adhesion.
2. Peel off the adhesive backing from the magnetic ring.
3. Carefully align and press the magnetic ring firmly onto the center of your phone's back or case. Ensure it is centered for optimal magnetic connection.
4. Allow the adhesive to set for a few minutes before attaching the charger.

## Operating Instructions

### Charging Your iPhone

1. Ensure your Clutch Pro is sufficiently charged (check LED indicators).
2. Align the Clutch Pro with the back of your iPhone. If your iPhone or case has built-in magnetic compatibility, the charger will snap into place. If using the magnetic ring, ensure it aligns properly.
3. Plug the built-in Lightning cable from the Clutch Pro into your iPhone's Lightning port.
4. The charger will automatically begin charging your device. The LED indicators on the Clutch Pro will show its remaining power.
5. To stop charging, simply unplug the Lightning cable from your iPhone.

*Note: The Clutch Pro is not a wireless charger. Charging occurs via the built-in Lightning cable.*

### Checking Battery Level

Press the small power button on the side of the Clutch Pro to view the current battery level via the LED indicators:

- **Four LEDs:** 75-100% charged
- **Three LEDs:** 50-75% charged
- **Two LEDs:** 25-50% charged
- **One LED:** 0-25% charged (recharge soon)

## Maintenance

Proper care and maintenance will extend the life of your Clutch Pro charger:

- **Cleaning:** Use a soft, dry cloth to clean the surface of the charger. Do not use harsh chemicals or abrasive materials, as they may damage the finish.
- **Storage:** Store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For optimal battery life, avoid fully discharging the charger regularly. Recharge it when the battery level is low. If storing for extended periods, charge it to about 50% every few months to prevent deep discharge.

## Troubleshooting

If you encounter any issues with your Clutch Pro charger, please refer to the following table for common problems and solutions:

| Problem | Possible Cause | Solution |
|---|---|---|
| Charger not charging device | Low battery on Clutch Pro | Recharge the Clutch Pro fully. |
| Charger not charging device | Cable not properly connected | Ensure the built-in Lightning cable is securely plugged into your iPhone. |
| Charger not charging device | Incompatible device | Verify your device is compatible (iPhone 14, 13, 12, 11, X, 8 & Older Models). |
| Magnetic attachment is weak | Phone case interference or improper magnetic ring placement | Ensure the magnetic ring is properly installed and centered. Some thick cases may reduce magnetic strength. |
| Slow charging | Device battery health or background apps | Charging time may vary based on your phone's battery health and active applications. Close unnecessary apps for faster charging. |

## Specifications
