

Clutch CP-PI-5000

Clutch Pro Portable iPhone Charger User Manual

Model: CP-PI-5000

Brand: Clutch

INTRODUCTION

Thank you for choosing the Clutch Pro Portable iPhone Charger. This ultra-thin, magnetic 5000mAh power bank with a built-in Lightning cable is designed for convenient on-the-go charging. This manual provides essential information for safe and efficient use of your device. Please read it thoroughly before operation.

PRODUCT OVERVIEW

The Clutch Pro is engineered to be the world's thinnest portable iPhone charger, measuring just 0.32 inches thick. It features a 5000mAh battery capacity, a magnetic attachment for secure connection to your iPhone or MagSafe-compatible case, and a built-in Lightning cable for direct charging. LED indicators display the remaining battery level.

SETUP

- 1. Initial Charge:** Fully charge your Clutch Pro before first use. Connect the provided USB-A to USB-C cable to the Clutch Pro's USB-C input port and a power source. The LED indicator lights will show charging progress. All four lights will illuminate when fully charged.
- 2. Magnetic Attachment (Optional):** If your phone or case is not MagSafe compatible, use the included magnetic ring. Peel off the adhesive backing and carefully align and attach the ring to the back of your phone or case. Ensure it is centered for optimal magnetic connection with the Clutch Pro.

Powerful & Long Lasting

5,000 mAh for Clutch® Pro

OPERATING INSTRUCTIONS

Charging the Clutch Pro

- Connect the provided USB-A to USB-C cable to the USB-C input port on the side of the Clutch Pro.
- Plug the other end of the cable into a compatible USB power adapter (not included) or a computer's USB port.
- The LED indicator lights on the Clutch Pro will illuminate to show the charging status. Each light represents approximately 25% charge. All four lights will be solid when fully charged.
- A full charge takes approximately 2 hours.

Charging Your Device

1. **Connect:** Pull out the built-in Lightning cable from the Clutch Pro. Insert the Lightning connector into your iPhone's charging port.
2. **Magnetic Attachment:** Align the Clutch Pro with the back of your iPhone. The magnetic connection will secure the charger to your device.
3. **Initiate Charge:** Press the power button on the side of the Clutch Pro to begin charging your iPhone. The LED indicators will show the remaining power in the Clutch Pro.
4. **Monitor:** Your iPhone's screen will indicate that it is charging. The Clutch Pro can fully charge a 3279mAh phone (e.g., iPhone 14) from 0-100% in approximately 45 minutes (with 100% battery health). Charging time may vary based on battery health and usage.
5. **Disconnect:** Once your device is charged, disconnect the Lightning cable and reinsert it into its slot on the Clutch Pro. Remove the Clutch Pro from your iPhone.

MAINTENANCE

- Keep the Clutch Pro clean and dry. Use a soft, dry cloth to wipe the surface.
- Avoid exposing the device to liquids or excessive moisture.
- Store in a cool, dry place when not in use.
- Do not use abrasive cleaners or solvents.

TROUBLESHOOTING

Device Not Charging

- Ensure the Clutch Pro is sufficiently charged. Check the LED indicators.
- Verify that the Lightning cable is securely connected to both the Clutch Pro and your iPhone.
- Check for any debris or damage in the charging ports of both devices.
- Press the power button on the Clutch Pro to activate charging.

Clutch Pro Not Recharging

- Ensure the USB-A to USB-C cable is properly connected to the Clutch Pro's USB-C input port and a working power source.
- Try a different USB power adapter or USB port.
- Check the charging cable for any damage.

Magnetic Attachment Issues

- Ensure your iPhone or case is MagSafe compatible.
- If using the magnetic ring, ensure it is properly installed and centered on your device or case.
- Remove any thick cases that might interfere with the magnetic connection.
