SETUP

Initial Charging of the Power Bank:

Before first use, it is recommended to fully charge your WeeFancy Mini Power Bank. This ensures optimal battery performance and longevity.

1. Connect the power bank to a power source using one of the following methods:
 - Use the built-in USB-C cable and connect it to a USB wall adapter.
 - Use a separate USB-C cable and connect it to the USB-C input port on the power bank and a USB wall adapter.
 - Use a Lightning cable and connect it to the Lightning input port on the power bank and a USB wall adapter.
2. The digital display will show the charging progress. The power bank is fully charged when the display shows "100%".
3. A full charge typically takes approximately 3 hours with a compatible fast charger.

OPERATING INSTRUCTIONS

Charging Your Devices:

The WeeFancy Mini Power Bank offers multiple ways to charge your electronic devices.

1. **Using Built-in Cables:**
 - For iPhone/iPad (Lightning port): Pull out the built-in Lightning cable and connect it to your device.
 - For USB-C devices: Pull out the built-in USB-C cable and connect it to your device.
 - For Micro-USB devices: Pull out the built-in Micro-USB cable and connect it to your device.
2. **Using USB Ports:**
 - For USB-C devices: Connect your own USB-C to USB-C cable to the power bank's USB-C port and your device.

- For other devices: Connect your own USB-A cable to the power bank's USB-A output port and your device.
3. The power bank will automatically begin charging your device. The digital display will show the power bank's remaining battery percentage.

Simultaneous Charging:

You can charge multiple devices simultaneously using the various output options. Note that fast charging may not be supported when charging four devices at once.

MAINTENANCE

To ensure the longevity and optimal performance of your WeeFancy Mini Power Bank, follow these maintenance guidelines:

- **Storage:** Store the power bank in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the power bank. Do not use harsh chemicals or abrasive materials.
- **Battery Care:** For best battery health, fully charge the power bank at least once every three months if not in regular use. Avoid completely draining the battery frequently.
- **Safety Features:** The power bank includes a Multi Protect safety system with features such as overcharge protection, high current protection, battery short-circuit protection, overheating protection, IPS356 smart chip, and low current charging protection. These features are designed to protect both the power bank and your devices.

TROUBLESHOOTING

If you encounter any issues with your WeeFancy Mini Power Bank, please refer to the following common problems and solutions:

Problem: The power bank is not charging.

Solution: Ensure the charging cable is securely connected to both the power bank and the power source. Try a different cable or wall adapter. Verify that the power source is active. If using a USB-C or Lightning input, ensure the correct cable type is used.

Problem: Devices are not charging from the power bank.

Solution: Check if the power bank has sufficient charge (digital display should show a percentage above 0%). Ensure the device's charging cable (built-in or external) is properly connected to both the power bank and the device. Try a different cable or device to isolate the issue. Some devices may require a specific charging protocol; ensure compatibility.

Problem: Slow charging speed.

Solution: Ensure you are using a fast-charging compatible wall adapter when charging the power bank. When charging devices, verify that your device supports fast charging and that only one device is connected for optimal speed. Charging multiple devices simultaneously may reduce individual charging speeds.

Problem: The power bank feels warm during charging/discharging.

Solution: It is normal for the power bank to generate some heat during operation, especially during fast charging or when charging multiple devices. If it becomes excessively hot, disconnect it

immediately and allow it to cool down. Ensure it is used in a well-ventilated area and not covered.
