LC-M27-QHD-180 - 27" PC Monitor User Manual

Brand: LC-Power | Model: LC-POWER

PRODUCT OVERVIEW

The LC-M27-QHD-180 is a 27-inch (68.58 cm) PC monitor designed to deliver a high-quality visual experience. It features a QHD resolution of 2560 x 1440 pixels, providing sharp and detailed images. The IPS panel ensures an ultra-fast 1 ms response time, excellent color accuracy, and wide viewing angles. With a refresh rate of 180 Hz, content display is very fluid, making it suitable for fast-paced applications and gaming.

Key features include Adaptive Sync for smooth gameplay, Picture-by-Picture (PbP) and Picture-in-Picture (PiP) for multi-source viewing, and a height-adjustable stand with integrated cable management for ergonomic use. The monitor also supports a pivot feature, allowing it to be rotated 90 degrees for vertical document viewing.

Image: Front view of the LC-M27-QHD-180 monitor, showcasing its display and sleek design.

SETUP GUIDE

1. Unpacking and Contents

Carefully remove all components from the packaging. Please verify that all items listed below are present:

- LC-M27-QHD-180 Monitor
- Monitor Base
- HDMI Cable
- Power Adapter
- Mounting Material
- User Manual (this document)

2. Assembly

Attaching the Base:

1. Place the monitor screen face down on a soft, clean surface to prevent scratches.
2. Align the stand arm with the slot on the back of the monitor.
3. Secure the stand arm to the monitor using the provided screws.
4. Attach the base plate to the stand arm and tighten the screws.

Image: Rear view of the monitor, illustrating the stand assembly area and cable management design.

VESA Mounting: The monitor is VESA compatible. If you intend to use a VESA mount, remove the stand arm after assembly and attach your VESA mount according to its instructions.

3. Connecting the Monitor

- **Power Connection:** Connect the power adapter to the monitor's power input and then plug the power adapter into a wall outlet.
- **Video Connection:** Connect one end of the provided HDMI cable to the HDMI port on your computer's graphics card and

the other end to an HDMI input port on the monitor.

- Ensure all connections are secure.

Image: Side view of the monitor, showing its slim design and connectivity ports.

4. Initial Power On

Press the power button on the monitor. The power indicator light should illuminate. Your computer should automatically detect the new display. If not, adjust display settings in your operating system.

OPERATING INSTRUCTIONS

On-Screen Display (OSD) Menu

The monitor features an On-Screen Display (OSD) menu for adjusting various settings. Use the control buttons located on the monitor (typically on the back or bottom edge) to navigate the OSD menu.

Key Features and Settings

- **Adaptive Sync:** This technology synchronizes the monitor's refresh rate with your graphics card's frame rate, reducing screen tearing and stuttering for a smoother gaming experience. Enable this feature in your graphics card settings and on the monitor's OSD if applicable.
- **Overdrive:** Overdrive pre-calculates and accelerates specific pixels, significantly reducing response times for both black-and-white and color nuance changes, resulting in clearer motion.
- **Low Blue Light:** The Low Blue Light filter reduces the emission of harmful blue light from the screen, minimizing eye strain and fatigue during prolonged use. This feature can be adjusted via the OSD menu.
- **Picture-by-Picture (PbP) / Picture-in-Picture (PiP):**
 - **PbP:** Allows you to display content from two different input sources side-by-side on the same screen.
 - **PiP:** Displays the image from a second source as a smaller, scalable window (up to 25% of original size) that can be positioned anywhere on the main screen.

These modes are accessible through the OSD menu.

- **FPS / RTS Modes:** Dedicated display modes optimized for First Person Shooter (FPS) and Real-Time Strategy (RTS) games. These modes enhance visibility and provide a better gaming experience by adjusting display parameters.
- **Pivot Feature:** The monitor can be rotated 90 degrees to a vertical (portrait) orientation. This is particularly useful for reading documents, coding, or web browsing.

Image: Diagram illustrating the monitor's ability to pivot 90 degrees for vertical viewing.

Note: After physically rotating the monitor, you must adjust the display orientation settings within your operating system (e.g., Windows Display Settings) to match the new physical orientation.

- **Height Adjustable Stand & Cable Management:** The integrated stand allows for height adjustment to achieve an ergonomic viewing position. Cables can be neatly routed through the stand's built-in cable management system to maintain a tidy workspace.

Image: Close-up of the monitor's stand, highlighting the integrated cable management feature.

MAINTENANCE

To ensure the longevity and optimal performance of your monitor, follow these maintenance guidelines:

- **Cleaning the Screen:** Gently wipe the screen with a soft, lint-free cloth specifically designed for electronics. For stubborn marks, lightly dampen the cloth with water or a non-abrasive, monitor-safe cleaning solution. Do not spray liquid directly onto the screen.
- **Cleaning the Casing:** Use a soft, dry cloth to clean the monitor's casing. Avoid using harsh chemicals or abrasive materials.
- **Ventilation:** Ensure the ventilation openings on the monitor are not blocked to prevent overheating.
- **Power Off:** Always power off the monitor and unplug it from the power outlet before cleaning or if it will not be used for an extended period.
- **Avoid Direct Sunlight:** Do not expose the monitor to direct sunlight or excessive heat.

TROUBLESHOOTING

If you encounter issues with your LC-M27-QHD-180 monitor, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No image on screen	Monitor not powered on; video cable loose or disconnected; incorrect input source selected.	Ensure power cable is securely connected and monitor is turned on. Check video cable connections (HDMI). Select the correct input source via the OSD menu.
Image is blurry or distorted	Incorrect resolution setting; video cable issue.	Set the display resolution to 2560 x 1440 pixels in your computer's display settings. Try a different HDMI cable if available.
No sound (if monitor has speakers/audio out)	Audio cable not connected; volume too low; incorrect audio output selected on computer.	Ensure audio cable (if used) is connected. Adjust monitor volume via OSD. Select the monitor as the default audio output device in your computer's sound settings.
Screen flickering	Refresh rate mismatch; faulty cable; graphics driver issue.	Ensure refresh rate is set to 180 Hz in display settings. Try a different video cable. Update your graphics card drivers.

For more detailed troubleshooting or persistent issues, please consult the full user manual or contact LC-Power customer support.

SPECIFICATIONS

Feature	Detail
Model Number	LC-POWER (LC-M27-QHD-180)
Screen Size	27 Inches (68.58 cm)
Resolution	QHD Wide 1440p (2560 x 1440 pixels)
Aspect Ratio	16:9
Refresh Rate	180 Hz
Response Time	1 ms
Panel Type	IPS
Screen Surface	Flach (Flat)
Product Dimensions (L x W x H)	28.74 x 18.9 x 8.66 inches
Item Weight	17.73 pounds
Manufacturer	LC Power
ASIN	B0CQJNV3YR
Date First Available	May 31, 2024
