To maintain the brushed nickel finish, clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, steel wool, or harsh chemicals, as these can damage the finish.

7.2 Cleaning the Aerator

If water flow becomes restricted or irregular, the aerator may need cleaning. Use the provided blue key to carefully remove the aerator from the sprayer head. Rinse any debris from the aerator screen under running water. Reinstall the aerator securely.

EASY TO CLEAN

For speedy cleaning, use your fingertips.

8. TROUBLESHOOTING

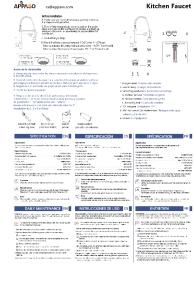

Problem	Possible Cause	Solution

Leaks from Faucet Base	Loose mounting nut; worn gasket.	Tighten mounting nut; replace gasket if damaged.
Leaks from Sprayer Head	Loose connection; damaged O-ring.	Ensure sprayer hose is tightly connected; inspect and replace O-rings if necessary.
