Safety Precautions

To ensure safe operation and prevent damage to the device or injury, please observe the following safety guidelines:

- **Check Voltage before Use:** Always verify that the power supply voltage matches the machine's requirements (110 Volts).
- **Operate with Flat Surface:** Use the heat press on a stable, flat, and heat-resistant surface.
- **Unplug When Not Using:** Disconnect the power cord from the outlet when the machine is not in use or before cleaning.
- **No Water:** Do not expose the machine to water or operate it with wet hands. Avoid using it in damp environments.
- **No Children:** Keep the heat press out of reach of children. This is not a toy.
- **No Heating Parts:** Avoid direct contact with the hot heating plate during and immediately after operation. Always use the insulated base.

Temperature Settings

The Easy Count E Mini Heat Press Machine offers three distinct temperature settings. The indicator lights on the side of the machine will show the current temperature level:

- **Low Temperature:** 145°C (285°F) - Indicated by one green light.
- **Medium Temperature:** 160°C (320°F) - Indicated by two green lights.
- **High Temperature:** 185°C (365°F) - Indicated by three green lights.

To cycle through the temperature settings, short press the power button. The machine will heat up rapidly to the selected temperature.

General Usage Steps

1. **Prepare Your Item:** Place your garment or item on a flat, firm, and heat-resistant surface. Ensure it is smooth and free of wrinkles.
2. **Place Design:** Position your HTV vinyl or transfer design onto the item as desired.
3. **Preheat Machine:** Turn on the heat press and select your desired temperature setting. Allow the machine to

preheat until the indicator light turns green, signifying it has reached the set temperature.

4. **Apply Heat:** Gently place the hot plate of the heat press onto your design. Apply even, firm pressure. The duration of pressing will depend on your material and transfer type; refer to your vinyl or transfer instructions.
5. **Cool Down:** Once pressing is complete, carefully lift the heat press and immediately place it back on its insulated safety base. Allow the item and design to cool before peeling (if required by your transfer type).

Maintenance

- **Cleaning:** Ensure the machine is unplugged and completely cool before cleaning. Wipe the heating plate with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the heat press in a dry, cool place, away from direct sunlight and moisture. Always place it on its insulated safety base when not in use. The included fleece bag can be used for protection during storage or travel.
- **Regular Inspection:** Periodically check the power cord for any signs of damage. If any damage is found,

discontinue use and contact customer support.

Troubleshooting

Problem	Possible Cause	Solution
Machine does not turn on.	Not plugged in; power outlet issue; faulty cord.	Ensure power cord is securely plugged into a working outlet. Try a different outlet. Inspect cord for damage.
Machine not heating up.	Incorrect temperature setting; internal malfunction.	Ensure desired temperature is selected (check indicator lights). Allow sufficient time to heat. If problem persists, contact support.
Heat transfer not adhering properly.	Insufficient heat; insufficient pressure; incorrect pressing time; material incompatibility.	Increase temperature or pressing time. Apply more firm, even pressure. Consult your transfer material's instructions. Ensure material is suitable for heat pressing.
