JoyBear JC-55

JoyBear Cold Press Juicer User Manual

Model: JC-55

INTRODUCTION

This manual provides detailed instructions for the safe and efficient operation, assembly, maintenance, and troubleshooting of your JoyBear Cold Press Juicer. Designed for high juice yield and ease of use, this slow masticating machine features a 5.3-inch extra-large feed chute, allowing you to process whole fruits and vegetables with minimal preparation. Please read this manual thoroughly before first use to ensure optimal performance and longevity of your appliance.

SAFETY INFORMATION

Your safety is paramount. Please observe the following precautions:

- **Automatic Safety Sensor:** The juicer is equipped with an automatic safety sensor. If the lid of the feed chute is opened during operation, the machine will automatically stop to prevent injury.
- **Lid with Safety Lock:** Ensure the lid is properly aligned and locked before operating the juicer. This prevents incorrect start-up and ensures safe use.
- **Assembly and Disassembly:** When assembling or disassembling the juicer, the cover must be open to correctly attach or remove the chute. Attempting to force it closed or open when not properly aligned can cause damage.
- Keep hands and utensils out of the feed chute during operation. Always use the provided food pusher.
- Do not immerse the motor base in water or other liquids.
- Unplug the juicer from the power outlet when not in use, before cleaning, or before assembling/disassembling parts.
- This appliance is not intended for use by children. Keep out of reach of children.

Automatic Safety Sensor

If the lid is opened during operation, the machine will stop working for your protection

PRODUCT COMPONENTS

The JoyBear Cold Press Juicer consists of several key components designed for easy assembly and efficient juicing:

- **Motor Base:** Contains the powerful 200W motor and control dial.
- **Juicing Bowl:** The main chamber where juicing occurs, with juice and pulp outlets.
- **Auger (Screw Propeller):** The masticating component that crushes and presses fruits and vegetables.
- **Filter Basket:** Separates juice from pulp. Features double filtration for better taste.
- **Feed Chute Lid:** Covers the feed chute and includes the safety sensor.
- **Food Pusher:** Used to guide ingredients into the feed chute.
- **Juice Container:** Collects the extracted juice.
- **Pulp Container:** Collects the separated pulp.
- **Cleaning Brush:** For easy cleaning of components.

SETUP AND ASSEMBLY

Assembling your JoyBear Cold Press Juicer is a simple process. Follow these steps:

1. Place the motor base on a stable, flat surface.
2. Align the juicing bowl with the motor base and rotate it clockwise until it locks into place.
3. Insert the auger into the center of the juicing bowl.
4. Place the filter basket over the auger, ensuring it sits securely in the juicing bowl.
5. Attach the feed chute lid, aligning the lock indicators. Ensure the lid is open during this step for proper alignment. Rotate the lid clockwise until it clicks and locks into position.
6. Place the juice container under the juice outlet and the pulp container under the pulp outlet.

OPERATING INSTRUCTIONS

Follow these steps to operate your JoyBear Cold Press Juicer:

1. **Prepare Ingredients:** Wash all fruits and vegetables thoroughly. Thanks to the 5.3-inch extra-large feed chute, many whole fruits and vegetables can be added directly without extensive chopping. For harder or fibrous ingredients, it is recommended to cut them into smaller pieces to optimize juicing and prevent clogging.
2. **Power On:** Plug the juicer into a suitable power outlet. Turn the control dial to the "ON" position to start the juicing process.
3. **Add Ingredients:** Slowly feed the prepared ingredients into the feed chute. Use the food pusher to gently guide them down. Do not force ingredients into the chute, as this can strain the motor. The automatic feeding design will draw ingredients in.
4. **Juicing Process:** The slow masticating auger will gently crush and press the produce, extracting juice and separating pulp. The upgraded spiral auger ensures a high juice yield, preserving nutrients and flavor.
5. **Reverse Function:** If ingredients become jammed or the juicer stops, turn the dial to the "REV" (Reverse) position. This will rotate the auger in the opposite direction to clear any blockages. Once cleared, return the dial to "OFF" and then "ON" to resume juicing.
6. **Finish Juicing:** Once all ingredients are processed, turn the control dial to the "OFF" position and unplug the juicer.

5.3-inch Large Feed Chute

Fits whole fruits and vegetables

MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygienic operation of your juicer. The JoyBear juicer is designed for easy cleaning, taking approximately 5 minutes.

- Disassembly:** Unplug the juicer. Disassemble the components in reverse order of assembly. Remember to keep the lid open during disassembly to successfully remove the chute.
- Rinse Components:** Rinse all removable parts (juicing bowl, auger, filter basket, lid, containers) under running water immediately after use to prevent pulp from drying and sticking.

3. **Brush Cleaning:** Use the included special brush to clean the filter basket and auger thoroughly. Pay close attention to the mesh of the filter to remove all pulp residue.
4. **Cleaning the Juicing Bowl:** When cleaning the juicing bowl, open the sealing plug at the bottom to completely remove any residue. Ensure this plug is snapped back on securely before reassembly.
5. **Wipe Motor Base:** Wipe the motor base with a damp cloth. Never immerse the motor base in water.
6. **Drying:** Allow all parts to air dry completely before reassembling or storing the juicer.
7. **Dishwasher Safe:** Most removable parts are dishwasher safe for convenience. Refer to the specifications for details.

For a visual guide on cleaning, please refer to the official product video in the "Operating Instructions" section.

TROUBLESHOOTING

If you encounter any issues with your JoyBear Cold Press Juicer, refer to the following common troubleshooting tips:

Problem	Possible Cause & Solution
Product Won't Start?	<ul style="list-style-type: none">- Check if the lid is secure; it must be tight to operate.- Over 30 minutes of use? It might overheat. Let it cool for 40 minutes.- Issues? JoyBear Support is here with a 2-year warranty.
Install/Disassemble Troubles?	<ul style="list-style-type: none">- Lid must be open to install or take apart.- Need help? JoyBear Support is here with a 2-year warranty.
Stops Unexpectedly?	<ul style="list-style-type: none">- Over 30 mins use can overheat it. Cool down for 40 mins.- Lid loose? Tighten it to restart.- Problems? JoyBear Support is here with a 2-year warranty.
About Juicing.	<ul style="list-style-type: none">- It's a slow juicer, not like citrus juicers. Soft fruits yield less juice but keep more nutrients.- Mix hard fruits for better results.
Fruit stuck?	<ul style="list-style-type: none">- Stir with the pusher provided.- If stuck, press the reverse button.

SPECIFICATIONS

Feature	Detail
Brand	JoyBear
Model Name	JC-45 (Note: Item model number is JC-55, but Model Name is JC-45 in specs)
Color	Grey
Special Feature	Whole Fruit Processing
Product Dimensions	10"D x 6.22"W x 7.52"H
Finish Type	Mirror Satin
Recommended Uses	Apple (and other fruits/vegetables)
Product Care Instructions	Dishwasher Safe (for removable parts)
Capacity	1.3 Liters
Maximum Power	200 Watts
Power Source	AC/DC
Blade Material	Titanium
Voltage	120V
Number of Speeds	65 (RPM, likely)
Item Weight	7.54 pounds
Manufacture Year	2024
Date First Available	February 15, 2024

WARRANTY AND SUPPORT

The JoyBear Cold Press Juicer comes with a **2-year warranty**. For any product issues, technical support, or warranty claims, please contact JoyBear customer support. Refer to the product packaging or the official JoyBear website for contact information.
