2. Installing the FitPro App

To unlock the full potential of your smartwatch, download and install the "FitPro" app on your smartphone. The app is compatible with Android 5.0+ and iOS 9.2+ smart phones.

- Scan the QR code provided in the watch's packaging or on the watch screen (if available) to download the app.
- Alternatively, search for "FitPro" in your smartphone's app store (Google Play Store for Android, Apple App Store for iOS).
- You can also visit the official FitPro download page: [FitPro Download](#)

Better to enjoy music

When it is not convenient for you to pick up your mobile phone in exercise or daily life, you can easily switch songs by raising your wrist, so that you can enjoy music more fully.

Smart Notifications

KM15 smart watch can receive mobile phone notifications in real time when you are away from the phone and busy, including display of incoming call reminders, SMS, SNS notification and other app information notifications.

Image: A person's hand wearing the AcclaFit Smart Watch submerged in a swimming pool, illustrating its IP68 waterproof capability.

Cleaning and Care

- Wipe the watch and strap regularly with a soft, damp cloth.
- Avoid using harsh chemicals or abrasive materials.
- Ensure the charging contacts are clean and dry before charging.

TROUBLESHOOTING

If you encounter issues with your AcclaFit Smart Watch KM15, please refer to the following common solutions:

Problem	Possible Solution
Watch not turning on/charging	Ensure the charging cable is securely connected to both the watch and a power source. Check if the charging contacts are clean. Try a different USB port or power adapter.
Cannot pair with smartphone	Ensure Bluetooth is enabled on your phone and the watch is within range. Restart both the watch and your phone. Clear the Bluetooth cache on your phone. Make sure the FitPro app is updated to the latest version.
Inaccurate health data (HR, Steps)	Ensure the watch is worn snugly on your wrist, not too tight or too loose. Clean the sensor on the back of the watch. Calibrate the app if there's an option. Note that smartwatches are not medical devices and readings are for reference only.
Notifications not appearing	Check notification permissions for the FitPro app in your phone's settings. Ensure the app is running in the background. Verify that notifications are enabled within the FitPro app for specific applications.
Short battery life	Reduce screen brightness. Turn off unnecessary features like continuous heart rate monitoring if not needed. Limit the number of active notifications.
