MONDAWE DM6610GNI

MONDAWE Round Shower Faucet Set User Manual

Model: DM6610GNI

For assistance, please contact MONDAWE customer support.

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your MONDAWE Round Shower Faucet Set. Please read this manual thoroughly before installation and retain it for future reference. This shower system features a 10-inch rainfall shower head, a handheld shower combo, and a pressure balance valve to ensure a safe and comfortable showering experience.

2. SAFETY INFORMATION

- Ensure all local plumbing and building codes are followed during installation.
- Turn off the main water supply before beginning any installation or maintenance.
- Wear appropriate personal protective equipment, such as safety glasses and gloves.

- If you are unsure about any part of the installation, consult a qualified plumber.
- The pressure balance valve is designed to protect against sudden changes in hot or cold water pressure, reducing the risk of scalding.

3. WHAT'S INCLUDED

Verify that all components are present and undamaged before beginning installation. The package includes the following items:

Image 3.1: All components included in the MONDAWE Round Shower Faucet Set package.

1. 10-inch Rainfall Shower Head
2. Shower Arm
3. Handheld Shower
4. Shower Hose (59 inches)
5. Handheld Shower Holder
6. Pressure Balance Valve Body
7. Control Trim Plate and Handle

- 8. Mounting Hardware
- 9. Instruction Manual

4. INSTALLATION

This shower set is designed for wall-mounted installation and uses American standard 1/2 inch NPT threads for compatibility with most plumbing connections. Professional installation is recommended.

4.1. Rough-in Valve Installation

The pressure balance valve body must be installed within the wall. Ensure proper depth and orientation according to the markings on the valve body for hot and cold water inlets and shower outlets.

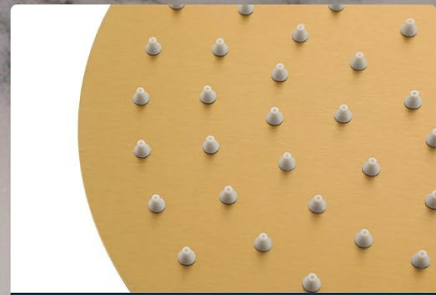

Image 4.1: Diagram illustrating the hot water inlet (NPT 1/2"), cold water inlet (NPT 1/2"), rainfall shower head outlet, and handheld shower outlet on the rough-in valve body.

4.2. Shower Head and Arm Installation

Thread the shower arm into the wall connection, ensuring it is securely tightened. Attach the 10-inch rainfall shower head to the shower arm. The shower head features a brass ball joint for 360-degree rotation, allowing for adjustment of the spray angle.

10" STAINLESS STEEL RAINFALL SHOWER HEAD

Easy to Clean Silicone Nozzle

Ultra-thin Design

Brass Ball Joint and 360° Rotation

4.3. Handheld Shower Installation

Mount the handheld shower holder to the wall at a convenient height. Connect the 59-inch stainless steel shower hose to the handheld shower and the corresponding outlet on the valve body.

STAINLESS STEEL HANDHELD SHOWER HEAD

5. OPERATING INSTRUCTIONS

The MONDAWE shower system is designed for easy operation with a single handle for temperature and flow control, and a diverter knob to switch between shower functions.

5.1. Water Flow and Temperature Control

The main handle controls both water flow and temperature. Rotate the handle to adjust the temperature from cold to hot. Lift the handle to increase water flow and push it down to decrease or turn off the flow.

5.2. Function Selection

Use the small knob on the control plate to switch between the rainfall shower head and the handheld shower. Only one function can be active at a time.

Image 5.1: Illustration of the shower control panel, demonstrating how to adjust water temperature (Hot/Cold) with the main handle and switch between rainfall and handheld shower functions with the diverter knob.

6. MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your shower system.

6.1. Cleaning the Shower Heads

Both the rainfall shower head and the handheld shower are equipped with silicone jet nozzles. To remove calcium and lime build-up, simply wipe the nozzles with your finger or a soft cloth. This is particularly effective in areas with hard water.

6.2. General Cleaning

Clean the brushed gold finish with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish. Mild soap and water are generally sufficient for routine cleaning.

7. TROUBLESHOOTING

If you encounter any issues with your shower system, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Low water pressure	Clogged shower head nozzles or debris in the system.	Clean silicone nozzles on shower heads. Check for debris in the water supply lines or valve.
Water temperature fluctuates	Issue with the pressure balance valve or water heater settings.	Ensure the pressure balance valve is correctly installed. Check your water heater settings. If problems persist, consult a plumber.
Leaking from connections	Loose connections or damaged seals.	Tighten all connections. Check and replace any worn or damaged O-rings or gaskets. Use plumber's tape on threaded connections during installation.
Diverter not switching functions	Debris in the diverter mechanism or internal component issue.	Flush the system. If the issue continues, the diverter cartridge may need inspection or replacement by a professional.

8. SPECIFICATIONS

Feature	Detail
Brand	MONDAWE
Model Number	DM6610GNI
Color	Brushed Gold
Material	Stainless Steel (Shower Head, Handheld, Hose), Solid Brass (Valve Body, Handheld Holder)
Finish Type	Brushed

Feature	Detail
Number of Handles	1
Mounting Type	Wall Mount
Maximum Pressure	180 Pound per Square Inch
Rainfall Head Size	10 inches
Hose Length	59 inches
Thread Standard	American Standard 1/2 inch NPT
