PonpEd liuyuanzhii

PonpEd Floor Cleaning Liquid Solution for Dibeas DC22/HC26 Vacuum Robots - 500ml User Manual

Model: liuyuanzhii

1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of the PonpEd Floor Cleaning Liquid Solution. This 500ml solution is specifically formulated for compatibility with Dibeas DC22 and HC26 vacuum robots, designed to clean various sealed hard floor surfaces.

2. SAFETY INFORMATION

- **Keep out of reach of children and pets.**
- Do not ingest. If swallowed, seek immediate medical attention.
- Avoid contact with eyes. In case of contact, rinse thoroughly with water for several minutes.
- Store in a cool, dry place away from direct sunlight.
- Use only as directed. This product is for floor cleaning purposes only.
- The product is mild in nature and produces low foam.

3. PRODUCT OVERVIEW

Figure 1: PonpEd 500ml Floor Cleaning Liquid Solution bottle. This image displays the white bottle with a blue label indicating "Cleaning Solution" and "Net Content: 500ml".

The PonpEd Floor Cleaning Liquid Solution is designed to provide effective cleaning for various hard floor types. Its formulation is gentle yet powerful, making it suitable for daily use.

For DC22 & HC26

Figure 2: PonpEd Cleaning Solution bottle with water splash background, indicating compatibility with Dibeas DC22 and HC26 models.

This solution is compatible with Dibeas DC22 and HC26 vacuum robots, ensuring optimal performance when used with these devices.

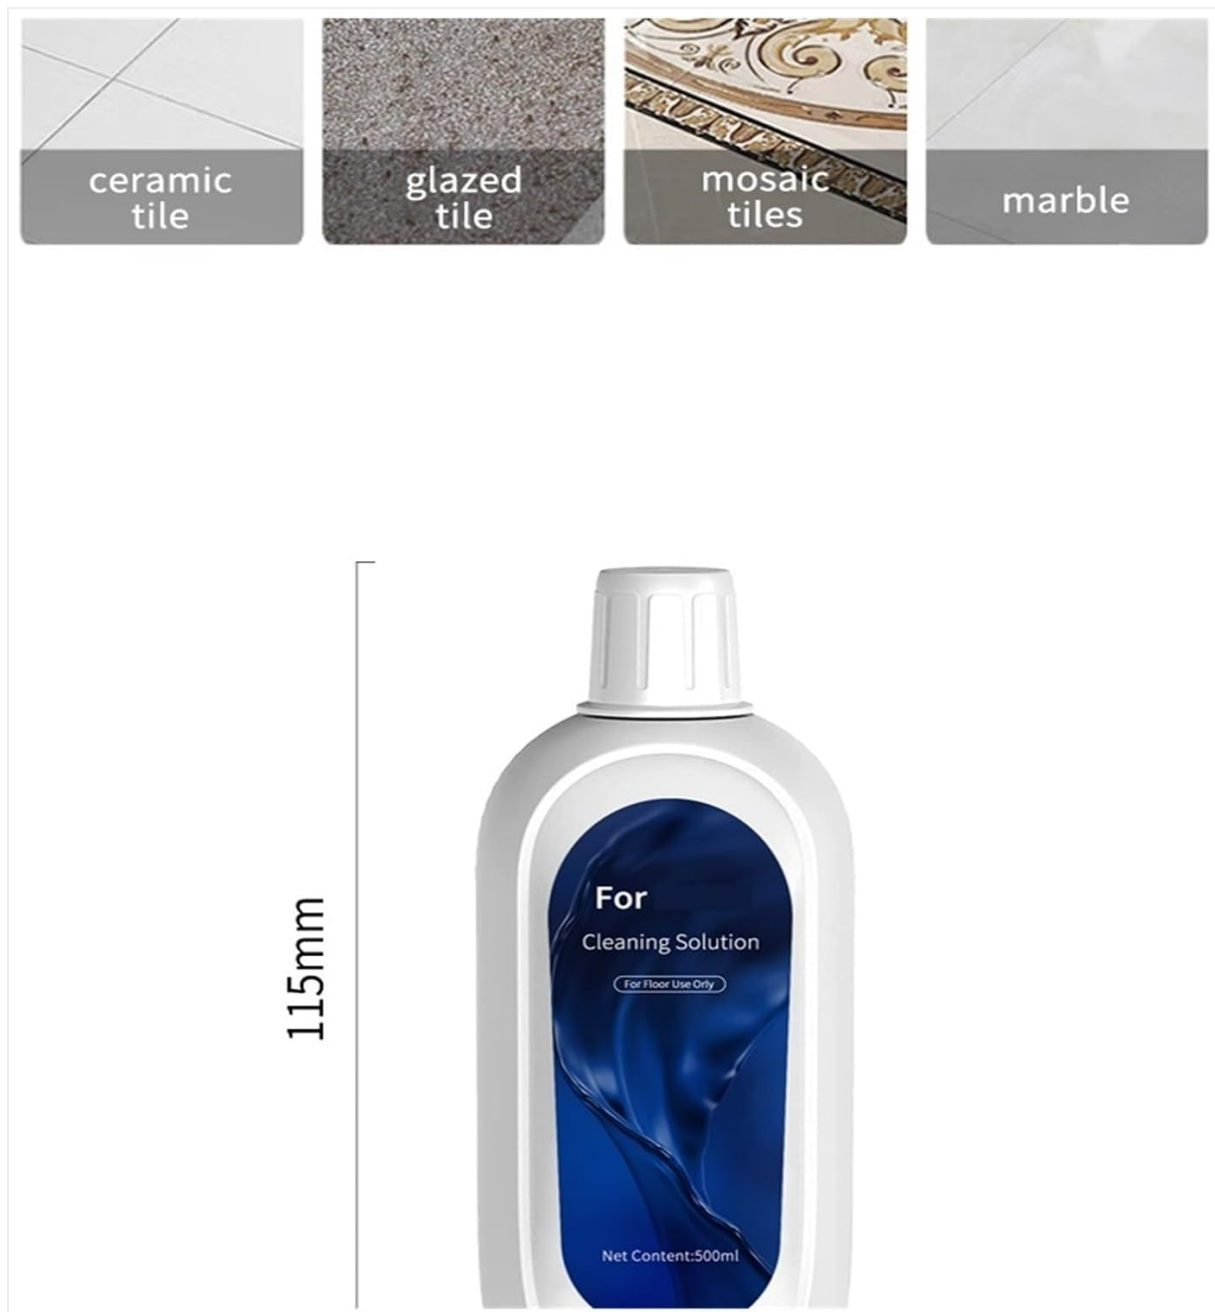

Figure 3: PonpEd Cleaning Solution bottle shown with icons representing compatible floor types: ceramic tile, glazed tile, mosaic tiles, and marble.

It is safe for use on sealed floors, including hardwood, tile, laminate flooring, ceramic tile, glazed tile, mosaic tiles, and marble.

4. SETUP AND PREPARATION

1. **Identify the Solution Tank:** Locate the cleaning solution tank on your DibeA DC22 or HC26 vacuum robot. Refer to your robot's specific user manual for tank location and removal instructions.
2. **Open the Tank:** Carefully open the solution tank.
3. **Fill with Solution:** Pour the PonpEd Floor Cleaning Liquid Solution into the tank. Do not overfill. Follow the fill lines or recommended ratios provided in your robot's manual if mixing with water is required (though this solution is typically used undiluted for maximum effectiveness).
4. **Secure the Tank:** Close the solution tank securely and reinsert it into the vacuum robot.

Note: The product can be easily disassembled and replaced as part of normal maintenance of the vacuum robot's solution tank.

5. OPERATING INSTRUCTIONS

Once the solution tank is filled and properly installed in your Dibeas DC22 or HC26 vacuum robot, proceed with the following steps:

1. **Prepare the Area:** Ensure the floor area to be cleaned is free of large debris that could obstruct the robot's movement or cleaning process.
2. **Start the Robot:** Activate your Dibeas DC22 or HC26 vacuum robot according to its operating instructions. The robot will dispense the cleaning solution as it cleans.
3. **Cleaning Action:** The solution is designed to remove grease from hard surfaces and effectively clean daily clutter in high-traffic areas.
4. **Post-Cleaning:** After the cleaning cycle is complete, allow the floor to air dry. No rinsing is typically required due to the low-foam, mild nature of the solution.

6. MAINTENANCE

- **Empty and Rinse Tank:** After each use, it is recommended to empty any remaining cleaning solution from the robot's tank and rinse the tank with clean water to prevent residue buildup.
- **Clean Robot Components:** Regularly clean the brushes, filters, and other components of your Dibeas vacuum robot as per its own maintenance guide to ensure optimal performance of both the robot and the cleaning solution.
- **Storage:** Store the PonpEd Floor Cleaning Liquid Solution bottle tightly capped in a cool, dry place.

7. TROUBLESHOOTING

- **Robot not dispensing solution:**
 - Check if the solution tank is properly filled and installed.
 - Ensure there are no blockages in the robot's dispensing nozzles.
 - Refer to your Dibeas robot's manual for specific troubleshooting related to solution dispensing.
- **Poor cleaning results:**
 - Ensure the floor was pre-swept or vacuumed to remove large debris.
 - Verify that the solution tank contains sufficient cleaning liquid.
 - Check the robot's brushes and pads for wear or dirt accumulation.

8. SPECIFICATIONS

Feature	Detail
Product Name	PonpEd Floor Cleaning Liquid Solution
Model Number	liuyuanzhii
Capacity	500ml
Compatibility	Dibea DC22, Dibea HC26 Vacuum Robots
Suitable Floor Types	Sealed hardwood, tile, laminate, ceramic tile, glazed tile, mosaic tiles, marble
Product Characteristics	Mild nature, low foam
Item Weight	1.1 pounds
Package Dimensions	1.18 x 0.79 x 0.39 inches

9. WARRANTY AND SUPPORT

This product is designed for reliable performance. For any questions or concerns regarding the PonpEd Floor Cleaning Liquid Solution, please contact our customer service. We are committed to responding to your inquiries within 24 hours.
