Operating the Model (Display and Interaction)

Once assembled, your nanoblock Yoshino Cherry model is designed for display. It is a static model and does not feature moving parts or electronic functions.

Display Recommendations:

- Place the model on a stable, flat surface to prevent accidental falls.
- Avoid direct sunlight or extreme temperatures to preserve the color and integrity of the plastic blocks.
- Keep away from areas with high humidity.

Maintenance and Care

To ensure the longevity of your nanoblock model, follow these care guidelines:

- **Cleaning:** Dust the model regularly with a soft, dry brush or a can of compressed air. For stubborn dirt, gently wipe with a slightly damp cloth, then dry immediately. Avoid harsh chemicals or abrasive cleaners.

- **Storage:** If disassembling for storage, keep all pieces in a sealed container to prevent loss and protect from dust.
- **Handling:** Handle the model carefully, especially when moving it, to avoid pieces detaching.

Troubleshooting

Missing Pieces:

While rare, if you believe a piece is missing, carefully re-check the packaging and your work area. Due to the small size of nanoblocks, pieces can sometimes be overlooked. If a piece is genuinely missing, contact KAWADA customer support (information not provided in this manual, please refer to product packaging or official website).

Difficulty Assembling:

If you encounter difficulty, review the previous steps and diagrams. Ensure all blocks are correctly oriented and fully connected. Sometimes, a small misalignment can affect subsequent steps.
