

Rafow DM01

Rafow 5-in-1 Milk Frother and Steamer Instruction Manual

Model: DM01

INTRODUCTION

Thank you for choosing the Rafow 5-in-1 Milk Frother and Steamer. This versatile appliance is designed to enhance your beverage experience by providing various milk preparation options. Please read this manual thoroughly before first use to ensure safe and optimal operation.

5-in-1 Functionality

This automatic milk frother and steamer offers five distinct functions:

- **Warm Airy Milk Froth:** Ideal for light and fluffy toppings.
- **Warm Dense Milk Froth:** Perfect for rich and creamy textures.
- **Hot Chocolate Milk:** Heats and mixes chocolate powder with milk.
- **Hot Milk:** Warms milk without frothing.
- **Cold Milk Froth:** Creates cold foam for iced beverages.

For best frothing results, it is recommended to use whole milk with a fat content greater than 3%.

5-in-1 Milk Frother

To make your favorite cappuccino, latte, macchiato, mocha, hot milk and hot chocolate

The Rafov Milk Frother offers five versatile functions for different milk preparations.

SAFETY INFORMATION

Please adhere to the following safety guidelines to prevent injury or damage to the appliance:

- Do not immerse the base or the exterior of the frother in water or any other liquid.
- Ensure the appliance is placed on a stable, flat, and dry surface.

- Keep out of reach of children.
- Do not operate if the power cord or plug is damaged.
- The frother features UL certification and Strix temperature control, automatically switching off when milk or froth is ready to prevent burning or over-frothing.

PRODUCT OVERVIEW

The Rafox Milk Frother features a sleek design with an ABS housing and a non-stick coated stainless steel interior. It includes a touch screen LED display for real-time temperature monitoring and mode selection.

Main view of the Rafox Milk Frother.

Components:

- Frother Unit with Handle
- Power Base
- Transparent Lid
- Magnetic Whisks (2 included: one for frothing, one for heating/mixing)
- Cleaning Brush

The magnetic whisk ensures efficient and leak-proof operation.

SETUP

1. Unpack all components and remove any packaging materials.
2. Clean the interior of the frother and the whisk with the provided cleaning brush and water. Wipe the exterior with a damp cloth. Ensure the bottom and outside do not come into contact with water.
3. Place the frother unit onto its power base.
4. Insert the desired magnetic whisk into the center of the frother's interior. For frothing, use the whisk with the coil. For heating or mixing, use the whisk without the coil.
5. Plug the power base into a suitable electrical outlet.

OPERATING INSTRUCTIONS

Adding Milk:

The frother has a capacity of 350ml for daily needs. Observe the internal markings for milk levels:

- **Maximum for Frothing:** 150 ml
- **Minimum for Frothing:** 100 ml
- **Maximum for Heating Milk or Hot Chocolate:** 300ml

Important: Do not exceed the maximum scale for each mode to prevent overflow.

MAINTENANCE AND CLEANING

Proper cleaning ensures the longevity and hygiene of your Raflow Milk Frother. The interior uses a non-stick coated stainless steel for easy cleaning.

1. After each use, immediately rinse the interior with water.
2. Rotate the whisk to detach it, then pull it out. Rinse the whisk under running water.
3. Use the provided sponge brush to scrub the inner wall of the frother.
4. Rinse the inside thoroughly with water.
5. Wipe the exterior of the frother with a damp towel.

Caution: The frother is not waterproof. The bottom and the outside should not come into contact with water. Do not rinse the outside under running water or immerse the unit in water. It is not suitable for dishwashers.

TROUBLESHOOTING

If you encounter issues with your frother, please refer to the common solutions below:

Problem	Possible Cause	Solution
Frother does not turn on.	Not plugged in; power outage; unit not properly seated on base.	Check power connection; ensure unit is correctly placed on the base.
Milk does not froth or froths poorly.	Incorrect milk type (e.g., low-fat milk); insufficient or excessive milk quantity; whisk not properly installed.	Use whole milk (fat content > 3%); ensure milk is between MIN and MAX frothing lines; check whisk placement.

Problem	Possible Cause	Solution
Milk overflows.	Milk quantity exceeds MAX line for selected mode.	Reduce milk quantity to appropriate level for the selected function.
Burning smell or scorched milk.	Unit not cleaned properly; milk residue.	Clean the interior thoroughly after each use. The automatic shut-off feature should prevent severe scorching.
