Maintenance

Regular maintenance helps prolong the life and appearance of your bed frame.

- **Cleaning the Frame:** Wipe the bed frame surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that may damage the finish or fabric.
- **Velvet Upholstery Care:** For the velvet headboard, gently vacuum with an upholstery attachment to remove dust. Spot clean any stains with a mild fabric cleaner, testing on an inconspicuous area first.
- **LED Lights:** Ensure the LED strip is free from dust. If cleaning is necessary, unplug the power source first and wipe gently with a dry cloth.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability.

Troubleshooting

This section addresses common issues you might encounter with your bed frame.

- **Squeaking Noises:** If the bed frame produces squeaking sounds, check all connection points and ensure all bolts are securely tightened. The design includes mute bars to minimize noise, but loose connections can still cause sound.
- **LED Lights Not Working:** Verify that the power adapter is securely plugged into both the bed frame and a working wall outlet. Check the remote control battery. If using the app, ensure Bluetooth connection is active. If the light strip appears faulty (e.g., showing incorrect colors), contact customer support for assistance.
- **Charging Ports Not Functioning:** Ensure the bed frame is powered on and connected to an electrical outlet. Test with different devices and cables to rule out device-specific issues.
- **Drawers Not Closing/Latching Properly:** Check for any obstructions under the bed or within the drawer tracks. Ensure the drawers are aligned correctly. The closing buckle should engage smoothly; if not, inspect the mechanism for damage or misalignment.
- **Headboard Adjustment Issues:** If the headboard does not adjust smoothly, check for any obstructions or ensure the adjustment mechanism is free from debris.
