5. MAINTENANCE

To ensure the longevity and cleanliness of your Dreamzie Metal Bed Frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal frame with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the lacquered finish.
- **Regular Checks:** Periodically inspect all connections and fasteners. Tighten any loose bolts to maintain stability and prevent squeaking.
- **Ventilation:** Ensure adequate air circulation around and under the mattress to prevent moisture buildup.

6. TROUBLESHOOTING

If you encounter any issues with your Dreamzie Metal Bed Frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame is unstable or wobbly.	Loose fasteners; incorrect assembly.	Ensure all bolts are fully tightened. Review assembly steps to confirm correct installation of all parts, especially the support legs and slat connectors.
Squeaking noises.	Loose connections; friction between metal parts.	Tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists.
Mattress slides on the frame.	Mattress not properly centered; frame slightly larger than mattress.	Ensure the mattress is centered. Consider using a non-slip mat between the mattress and the slats if sliding is significant.

If you cannot resolve the issue using these steps, please contact Dreamzie customer support.
