Belaco Hanging dehumidifier

Belaco Hanging Dehumidifier Instruction Manual

Model: Hanging Dehumidifier

Brand: Belaco

1. Product Overview

The Belaco Hanging Dehumidifier is a simple yet effective solution for controlling humidity in enclosed spaces. Each unit contains highly absorbent calcium chloride beads that draw excess moisture from the air, collecting it in a lower chamber. This process helps to prevent the growth of mold and mildew, eliminate musty odors, and protect your belongings from damp-related damage. It is ideal for use in wardrobes, closets, bathrooms, kitchens, basements, and other areas prone to humidity.

2. Setup

Setting up your Belaco Hanging Dehumidifier is quick and easy. No assembly is required.

1. **Unpack:** Carefully remove the dehumidifier unit from its outer packaging.
2. **Prepare for Use:** The dehumidifier is ready to use immediately after opening the outer bag. Do not open the inner bag containing the beads.
3. **Hang:** Use the integrated plastic hook to hang the dehumidifier in your desired location. Ensure there is sufficient space around the unit for air circulation to maximize its effectiveness.

3. Operating Instructions

Once hung, the dehumidifier will begin to absorb moisture from the air automatically.

- **Moisture Absorption:** The white calcium chloride beads will gradually absorb humidity from the surrounding air.
- **Water Collection:** As moisture is absorbed, it will convert into liquid and collect in the transparent lower section of the bag. You will observe the water level increasing over time.
- **Duration:** The effectiveness and lifespan of each dehumidifier unit can vary from 15 to 45 days, depending on the humidity levels in the environment where it is placed.

Image: A visual comparison showing the dehumidifier before use, after 5 days with some collected water, and after a longer period with more water, illustrating its moisture absorption capability.

4. Maintenance

The Belaco Hanging Dehumidifier is a single-use product and requires minimal maintenance.

- **Disposal:** When the calcium chloride beads have completely dissolved, or the lower collection chamber is full of water, it is time to replace the unit. Do not attempt to empty or refill the bag.
- **Safe Disposal:** Dispose of the entire bag responsibly according to your local waste disposal guidelines. The collected water is a saline solution and should be handled with care.

5. Troubleshooting

If you encounter any issues with your dehumidifier, consider the following:

- **No Moisture Absorption:** Ensure the outer packaging has been removed. Verify that the environment has sufficient humidity for the product to work. In very dry conditions, absorption will be minimal.

- **Slow Absorption:** This is normal in less humid environments. Ensure adequate air circulation around the unit.
- **Leakage:** While the bags are designed to be robust, inspect the unit for any visible damage or punctures. If a leak occurs, dispose of the unit immediately and clean the affected area.

6. Specifications

Feature	Detail
Product Name	Hanging Dehumidifier
Brand	Belaco
Model Number	Hanging dehumidifier
Unit Weight	230g (per unit)
Dimensions (L x W x H)	Approx. 2 x 16 x 36.8 cm (individual unit)
Main Ingredient	Calcium Chloride
Color	Clear
