Household Essentials HE1140

Household Essentials 4-Tier Shoe Storage Tree

Model: HE1140 | Matte Black

PRODUCT OVERVIEW

The Household Essentials 4-Tier Shoe Storage Tree is designed to efficiently organize and store up to 24 pairs of shoes. Its vertical, spinning design maximizes space, making it ideal for closets or compact areas. The sturdy steel construction and weighted base ensure stability, while adjustable tiers allow for versatile storage of various shoe types, including heels and boots.

SETUP AND ASSEMBLY

Assembly of the Household Essentials 4-Tier Shoe Storage Tree is required and designed to be straightforward. Please ensure all components are present before beginning.

Included Components:

- Weighted Base
- Steel Center Pole (multiple sections)

- 4 Adjustable Tiers
- Top Handle
- Hardware (knobs for securing tiers)

Assembly Steps:

1. Place the weighted base on a flat, stable surface.
2. Screw the first section of the steel center pole into the threaded opening on the weighted base. Ensure it is securely tightened.
3. Slide one adjustable tier onto the pole. Position it at the desired height and secure it using the provided knob. The knob should be tightened firmly to prevent the tier from slipping.
4. Continue adding the remaining pole sections and tiers, securing each tier at your preferred height. The pole sections screw together to form the full height.
5. Attach the top handle to the uppermost section of the pole.

OPERATING INSTRUCTIONS

The 4-Tier Shoe Storage Tree is designed for easy access and efficient storage.

Storing Shoes:

- Each tier is designed to hold multiple pairs of shoes. For optimal stability and balance, distribute shoes evenly around each tier. It is recommended to place shoes directly opposite each other to maintain balance, especially when loading or unloading.
- The tiers can accommodate various shoe sizes and styles, including loafers, athletic shoes, dress shoes, and ankle boots.
- For high heels, the tiers can be inverted. Simply loosen the knob, flip the tier upside down, and re-secure it. This allows the heels to rest securely within the inverted tier's structure.

Accessing Shoes:

- The tiers are designed to spin freely on the central pole. Gently rotate the desired tier to bring your shoes within reach.
- Ensure there is adequate clearance around the shoe tree for the tiers to spin without obstruction.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your shoe storage tree.

- **Cleaning:** Wipe down the metal surfaces with a soft, damp cloth. For tougher spots, a mild soap solution can be used, followed by drying thoroughly to prevent rust. Avoid abrasive cleaners or scouring pads, which can damage the powder-coated finish.
- **Inspection:** Periodically check all screw connections and knobs to ensure they remain tight. Loose connections can affect the stability of the unit.
- **Balance:** Always strive to balance the weight of shoes on each tier to prevent leaning or instability.

TROUBLESHOOTING

If you encounter issues with your shoe storage tree, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit is wobbly or leans	Uneven assembly; loose pole sections; unbalanced shoe distribution.	Ensure all pole sections are tightly screwed together. Verify tiers are securely fastened with knobs. Redistribute shoes evenly on all tiers, placing heavier items closer to the center or balancing them across from each other.
Tiers do not spin smoothly	Over-tightened knobs; debris on pole; excessive weight.	Loosen tier knobs slightly. Clean the central pole to remove any dust or debris. Reduce the number of shoes on the tier if it is overloaded.
Shoes fall off tiers	Improper shoe placement; tier not inverted for heels; unit instability.	Ensure shoes are placed securely within the tier's wire design. For high heels, invert the tier as described in the operating instructions. Address any wobbling issues as per the first troubleshooting point.

SPECIFICATIONS

Detailed specifications for the Household Essentials 4-Tier Shoe Storage Tree:

Feature	Detail
Model Number	HE1140
Material	Metal
Color	Matte Black
Product Dimensions (D x W x H)	12" x 12" x 52.7"
Number of Tiers/Shelves	4
Item Weight	15.5 Pounds
Assembly Required	Yes
Mounting Type	Floor Mount
Finish Type	Powder Coated
UPC	191009658726
