## OPERATING AND USAGE

The SOFTSEA bunk bed is designed for daily use by children, offering both sleeping and play areas.

- **Sleeping Areas:** The upper and lower bunks are designed for twin-sized mattresses. Ensure mattresses fit snugly within the frame.
- **Slide Usage:** The slide is intended for children's recreational use. Ensure the area around the slide is clear before use. Only one child should use the slide at a time.
- **Staircase Usage:** Use the staircase for safe access to the upper bunk. Encourage children to use the handrails.
- **Storage Drawers:** The two drawers under the staircase are ideal for storing toys, books, or bedding, helping to keep the room tidy.
- **Integrated Shelves:** The shelves on the staircase and near the slide provide additional space for small items or decorations.

For optimal safety, always supervise children when they are using the bunk bed, especially the slide and upper bunk.

## MAINTENANCE AND CARE

Proper maintenance will extend the life and appearance of your SOFTSEA bunk bed.

- **Cleaning:** Wipe down the wooden surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Hardware Checks:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections to ensure they are tight. Re-tighten if necessary to maintain stability and prevent wobbling.
- **Weight Distribution:** Ensure weight is distributed evenly on both bunks and within storage drawers to prevent strain on the frame.
- **Environmental Conditions:** Avoid placing the bed in direct sunlight or near heat sources, which can cause wood to warp or fade. Maintain a stable room temperature and humidity.
- **Slide and Staircase:** Keep the slide surface clean and free of obstructions. Consider applying anti-slip strips to the staircase steps for added safety, as suggested by some users.
- **Edge Protection:** For the lower bunk, consider adding foam edge protectors to the top bunk's underside edge if children frequently sit up in the lower bunk, to prevent accidental bumps.
