## Setup and Installation

The LUDOMIDE ceiling fan is designed for hassle-free installation, with most components pre-assembled. Follow these steps carefully:

### Pre-Installation Checklist

- **Turn off Power:** Before starting, ensure the power supply to the ceiling fan location is turned off at the circuit breaker or fuse box.
- **Mounting Location:** Verify that the ceiling electrical box is securely mounted and capable of supporting the fan's weight (approximately 9.23 pounds).
- **Tools Required:** Gather necessary tools such as a screwdriver, wire strippers, and a sturdy ladder.

### Installation Steps

1. **Attach Mounting Bracket:** Secure the mounting bracket to the ceiling electrical box using the provided screws. Ensure it is firmly attached.
2. **Hang Fan Unit:** Use the included S-hook to temporarily hang the fan unit from the mounting bracket. This will support the fan while you make electrical connections.
3. **Connect Wiring:** Connect the electrical wires from the ceiling to the fan unit's wires. Typically, this involves connecting Live (black), Neutral (white), and Ground (green/bare copper) wires using wire nuts. Refer to local electrical codes for specific color conventions.
4. **Secure Fan Unit:** Once wiring is complete, carefully lift the fan unit and align it with the mounting bracket. Secure the fan to the bracket using the remaining screws. Ensure all connections are tight and the fan is stable.
5. **Restore Power:** Turn the power back on at the circuit breaker.
6. **Test Functionality:** Test the fan and light functions using the remote control or smart app.
