7. MAINTENANCE

Proper maintenance will extend the life of your Moimhear Platform Bed.

- **Cleaning:** Wipe the bed surfaces with a soft, slightly damp cloth. Avoid using harsh chemicals, abrasive cleaners, or bleach, as these can damage the wood and finish.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all screws, bolts, and connections. Tighten any loose hardware to maintain the bed's stability and structural integrity.
- **Environment:** Keep the bed in a dry environment. Avoid prolonged exposure to direct sunlight or extreme temperature changes, which can cause warping or fading.
- **Moving:** If you need to move the bed, lift it carefully rather than dragging it to prevent damage to the frame and your flooring. For significant moves, partial disassembly may be required.

8. TROUBLESHOOTING

If you encounter any issues with your Moimhear Platform Bed, please refer to the following common solutions:

- **Bed feels unstable or wobbly:** Check all assembly hardware. Ensure all screws and bolts are securely tightened. Verify that the bed is placed on a level surface.

- **Trundle bed does not slide smoothly:** Check for any obstructions beneath the trundle unit. Ensure the wheels are clean and free of debris.
- **USB port not working:** Ensure the bed's power cable (if applicable) is properly connected to a functioning power outlet. Check the USB cable you are using for your device.
- **Missing parts or damaged components:** If you find any parts missing or damaged upon delivery, please contact customer support immediately with your purchase details.
- **Color differences:** Please note that due to manual measurement data, there may be an error of 2-3 cm. Also, product photos are taken with real products, but due to the influence of sunlight and other factors, there may be some color differences. This is not a defect.
