SAFETY INFORMATION

To ensure safe operation and prevent injury, please adhere to the following safety guidelines:

- **Weight Limit:** Do not exceed the maximum weight recommendation of 500 pounds for the Twin size bed frame.
- **Assembly:** Ensure all screws and bolts are fully tightened during assembly. Do not overtighten.
- **Stability:** Verify that all legs remain in firm contact with the ground after assembly and during use to maintain stability.
- **Regular Inspection:** Periodically check all screws and bolts to ensure they remain tight. Retighten as necessary.
- **Children:** Supervise children around the bed frame. Avoid excessive bouncing or jumping on the bed, as this can compromise structural integrity.
- **Placement:** Position the bed frame on a level surface.

Before beginning assembly, please verify that all components are present:

- 1 x Instruction Manual (this document)
- 1 x Assembly Kit (hardware and tools)

ASSEMBLY INSTRUCTIONS

Assembly typically requires two adults. Follow the step-by-step instructions provided in the included assembly kit. Do not tighten screws until the entire frame is loosely assembled to allow for adjustments.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list in the assembly kit.
2. **Assemble Headboard:** Attach the headboard support legs to the upholstered headboard using the designated hardware.
3. **Assemble Side Rails:** Connect the side rails to the headboard and footboard (if separate) using the appropriate bolts. Ensure connections are secure but do not fully tighten yet.
4. **Install Center Support:** Attach any center support beams or legs as indicated in the assembly guide.
5. **Place Wooden Slats:** Lay the wooden slats across the bed frame. Many VECELO bed frames feature a Velcro design for easy and noise-free slat installation. Ensure each slat is properly seated and secured.
6. **Final Tightening:** Once all components are in place and aligned, systematically tighten all screws and bolts. Ensure the bed frame is stable and level.
