6. Troubleshooting

If you encounter issues with your vanity desk, refer to the following common solutions:

Problem	Possible Cause	Solution
Lights not turning on.	Power cord not plugged in; loose connection; faulty bulb.	Ensure power cord is securely plugged into a working outlet. Check all electrical connections. Replace faulty bulbs if necessary (refer to assembly manual).
Lights not changing color or brightness.	Control button malfunction; temporary electrical glitch.	Unplug the vanity for 30 seconds and plug it back in to reset. Ensure you are pressing/holding the correct button as per instructions.
Power outlets/USB ports not working.	Vanity not powered; device not properly plugged in; device fault.	Verify the vanity is plugged into a live outlet. Ensure devices are fully inserted into the ports. Test with a different device to rule out device fault.
Drawers are stiff or difficult to open/close.	Misalignment during assembly; debris in tracks; overloaded drawer.	Check drawer slides for obstructions. Ensure drawers are not overloaded. Re-check assembly of drawer slides if issue persists.
