Yaheetech Queen Upholstered Platform Bed with Storage - Instruction Manual

Model: YT-00132356

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your Yaheetech Queen Upholstered Platform Bed. Please read all instructions carefully before assembly and use to ensure safe and correct operation. Keep this manual for future reference.

The Yaheetech Queen Upholstered Platform Bed features an adjustable headboard, four integrated storage drawers, and sturdy wood slat support, designed for comfort and functionality without the need for a box spring.

SAFETY INFORMATION

- Always follow the assembly instructions precisely. Incorrect assembly can lead to instability and potential injury.
- Ensure all bolts and screws are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not exceed the maximum weight recommendation of 794 pounds (360 kg).
- Keep small parts away from children during assembly to prevent choking hazards.
- Use on a level surface to prevent tipping.
- Avoid using power tools for assembly unless specifically instructed, as over-tightening can damage components.

SETUP AND ASSEMBLY

Your Yaheetech bed frame is shipped in two separate packages. Ensure you have received both packages before beginning assembly. It is recommended to assemble the bed with two people.

Required Tools (Not Included):

- Phillips head screwdriver
- Rubber mallet (optional, for slat installation)

Assembly Steps:

1. **Unpack Components:** Carefully unpack all parts and hardware. Verify all components are present against the

included parts list.

2. **Assemble the Frame:** Connect the side rails to the headboard and footboard using the provided hardware. Ensure all connections are firm.
3. **Install Center Support:** Attach the center support beam and legs to the main frame.
4. **Attach Slats:**

Attach the plastic parts on the outer slats.

Fix the slats on both sides of the bed.

Fit and fix the two middle slats with plastic parts.

- Attach the plastic caps to the ends of the outer slats.
 - Fix the slats into the designated slots on both sides of the bed frame.
 - Fit and secure the two middle slats with their plastic connectors. Ensure all slats are evenly spaced (approximately 4.5 inches apart) and firmly seated.
5. **Assemble Drawers:** Assemble the four storage drawers according to the instructions. Ensure the rollers are correctly attached for smooth operation.

METAL & WOOD SUPPORT

OPERATING INSTRUCTIONS

Adjusting the Headboard:

The headboard offers three height settings: 38.6 inches, 41 inches, and 43.3 inches. To adjust, loosen the bolts connecting the headboard to the frame, slide the headboard to the desired height using the pre-drilled holes, and re-tighten the bolts securely. This allows for optimal mattress fit and aesthetic preference.

Using the Storage Drawers:

STURDY DRAWER CONSTRUCTION

Welded connection and strong metal wire for excellent sturdiness.

The bed frame includes four fabric-lined storage drawers equipped with rollers for smooth operation. Simply pull the drawer handles to slide them out for access and push them back in to store items neatly under the bed. The drawers are designed with fixtures to prevent accidental sliding when not in use.

MAINTENANCE AND CARE

- **Fabric Care:** The velvet upholstery should be dry cleaned only. For minor spills, gently blot with a clean, dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **Frame Care:** Wipe the frame components with a soft, damp cloth. Avoid excessive moisture.
- **Regular Checks:** Periodically inspect all bolts and screws to ensure they remain tight. Re-tighten as needed to maintain stability and safety.
- **Drawer Maintenance:** Keep the drawer rollers free from dust and debris to ensure smooth gliding.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame feels wobbly or unstable.	Loose bolts or screws. Uneven floor surface.	Check and tighten all assembly bolts and screws. Ensure the bed is placed on a level surface.
Slats are squeaking.	Slats not properly seated or rubbing against the frame.	Ensure all slats are fully inserted into their plastic caps and seated correctly. Verify the center support is stable.
Drawers do not slide smoothly.	Rollers obstructed by debris. Drawer not assembled correctly.	Clean any debris from the rollers and the track area. Re-check drawer assembly to ensure rollers are properly installed.
Headboard is not at desired height.	Headboard not adjusted or tightened correctly.	Loosen headboard bolts, adjust to one of the three pre-drilled height settings, and re-tighten securely.
Chemical odor after unpacking.	New product off-gassing.	Allow the product to air out in a well-ventilated room for a few days. The odor should dissipate.
