5.2. Step-by-Step Assembly

1. **Unpack and Identify Parts:** Lay out all components and hardware. Match them against the parts list (Image 2) and ensure all pieces are present.
2. **Assemble the Headboard:** Attach the wingback sides to the main headboard panel using the provided hardware. Ensure the charging station is correctly oriented.
3. **Attach Side Rails:** Connect the side rails to the assembled headboard using the designated bolts.
4. **Install Footboard:** Secure the footboard to the other end of the side rails.
5. **Insert Center Support:** Place the metal center support beam(s) and attach any additional support legs as indicated in the instructions.
6. **Lay Wooden Slats:** Unroll or place the wooden slats across the frame. The slats are typically connected by Velcro for easy positioning and noise reduction. Ensure each slat is firmly seated.
7. **Final Tightening:** Once all parts are in place, carefully tighten all bolts and screws. Do not overtighten.

6. Operating the Charging Station

The integrated charging station in the headboard provides convenient access to power for your electronic devices.

6.1. Using the Power Outlets and USB Ports

- Ensure the bed frame's power cord is securely plugged into a functional wall outlet.
- The headboard features two standard AC outlets (110V/12A) and two USB ports (5V/2A).
- Plug your devices directly into the appropriate port for charging.
- The 4-inch deep storage space on top of the headboard can be used to place devices while they charge or for other small items.

7. Care and Maintenance

7.1. Upholstery Care

- Regularly vacuum the upholstered headboard using a soft brush attachment to remove dust and debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub.
- For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner according to its instructions, testing on an inconspicuous area first.

7.2. Frame Care

- Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability and prevent noise.
- Wipe metal and wooden surfaces with a soft, damp cloth. Avoid harsh chemicals.

- Ensure adequate air circulation around and under the bed to prevent moisture buildup.

8. Troubleshooting

Problem	Possible Cause	Solution
Bed frame makes noise (squeaking/creaking)	Loose connections, friction between components, uneven floor.	Check and tighten all bolts and screws. Ensure EVA strips are correctly placed between slats and frame. If on an uneven floor, consider using furniture pads or shims under legs.
Charging station not working	Power cord not plugged in, faulty outlet, device issue.	Verify the bed frame's power cord is fully plugged into a working wall outlet. Test the wall outlet with another device. Try a different charging cable or device to rule out device-specific issues.
Slats shifting or falling out	Slats not properly secured, excessive movement.	Ensure all slats are correctly positioned and the Velcro attachments are engaged. Avoid jumping or excessive force on the bed.
