Safety Information

Always follow basic safety precautions when installing and operating electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Ensure power is disconnected at the circuit breaker before installation or maintenance.
- All wiring must be in accordance with national and local electrical codes.
- Consult a qualified electrician if you are unsure about wiring or installation.
- Mount the fan securely to a ceiling joist or a suitable support structure capable of supporting the fan's weight.
- Do not insert objects into the fan blades while the fan is operating.
- This fan is suitable for outdoor use in covered areas, such as patios.

Setup and Installation

1. Choosing a Down Rod

The fan comes with three down rod options (6", 12", 23") to accommodate various ceiling heights. Select the appropriate length for optimal airflow and aesthetic appeal. A longer rod (e.g., 23") is recommended for higher ceilings to enhance air circulation.

2. Blade Assembly

The fan blades are dual-colored, offering a Classic Black finish on one side and a Wood Grain finish on the other. Choose

the side that best suits your decor. Attach each of the 8 blades securely to the motor assembly using the provided screws. Ensure proper alignment to prevent wobbling during operation.

3. Electrical Wiring

Connect the fan's wiring to your household electrical system according to the provided wiring diagram in the separate installation guide. Ensure all connections are secure and properly insulated. If you are not confident with electrical work, it is highly recommended to consult a certified electrician.

Operating Instructions

Your Fanbulous ceiling fan is controlled by a convenient remote control.

1. Remote Control Functions

The remote allows full control over the fan's settings:

- **Power Button:** Turns the fan and light on/off.
- **Fan Speed (1-6):** Adjusts the fan speed from gentle breeze (1) to powerful airflow (6).
- **Light On/Off:** Toggles the light independently.
- **Color Temperature (3CCT):** Cycles through 3000K (Warm White), 4500K (Natural White), and 6500K (Cool White). The fan features a memory function that preserves your last light setting for 10 seconds after turning off.
- **Reversible Fan Direction:** Changes the blade rotation for summer (downward airflow) or winter (upward airflow) modes.
- **Timer Settings (1H/4H/8H):** Sets the fan to automatically turn off after 1, 4, or 8 hours.
- **Mute Key:** Silences remote beeps.
- **Natural Wind Mode:** Automatically varies fan speed to simulate a natural breeze.

2. Light Temperature Adjustment

The integrated 24W LED light provides 2000 lumens of brightness and offers three color temperature options to suit your

preference and mood:

- **3000K:** Warm, inviting light for relaxation.
- **4500K:** Neutral, balanced light for general use.
- **6500K:** Cool, bright light for task-oriented activities.

3. Reversible Airflow for All Seasons

The reversible DC motor allows you to change the direction of the fan blades, optimizing comfort throughout the year:

- **Summer Mode (Downward Airflow):** Blades rotate counter-clockwise to create a downward breeze, providing a cooling effect.
- **Winter Mode (Upward Airflow):** Blades rotate clockwise to draw cool air up towards the ceiling, circulating warm air downwards and helping to distribute heat more evenly.

4. Quiet Operation

The advanced energy-saving DC motor operates quietly, with a noise level of approximately 35 dB, ensuring minimal

disturbance in your living environment.

Maintenance

Regular maintenance helps prolong the life and efficiency of your ceiling fan.

- **Cleaning:** To avoid scratching the finish, clean the fan with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Blade Inspection:** Periodically check the blade attachments for tightness. Loose blades can cause wobbling and noise.
- **Light Kit:** The LED light kit is designed for long-term use and typically does not require bulb replacement.

Troubleshooting

If you encounter issues with your Fanbulous ceiling fan, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Fan does not start	No power supply; Loose wiring; Remote control battery low.	Check circuit breaker; Verify all wire connections; Replace remote control batteries.
Fan wobbles	Loose blades; Improperly balanced blades; Loose mounting bracket.	Ensure all blade screws are tight; Use the included balancing kit if necessary; Tighten mounting bracket screws.
Light does not work	Loose wire connection to light kit; Faulty LED driver.	Check light kit wiring; Contact customer support if LED driver is suspected.
Remote control not responding	Battery low or dead; Remote not paired with fan.	Replace batteries; Refer to the remote pairing instructions in the full manual.

For issues not listed here, or if troubleshooting steps do not resolve the problem, please contact Fanbulous customer support.
