3. Operating Instructions

3.1 Connecting to a Wi-Fi Network

1. After successful installation, click on the Wi-Fi icon in your computer's taskbar (usually in the bottom-right corner).
2. A list of available Wi-Fi networks will appear.
3. Select your desired network and click 'Connect'.
4. If prompted, enter the network security key (password) and click 'Next' or 'Connect'.
5. Your computer should now be connected to the Wi-Fi network.

3.2 High-Speed Wireless Connectivity

The adapter utilizes IEEE 802.11n/g/b standards and an MT 7601 Chipset to deliver a 2.4GHz enhanced 150Mbps

wireless data transmission rate. This ensures wide range and ultra-fast internet speeds for efficient browsing, streaming, and downloading.

3.3 Enhanced Multimedia Experience

With Wi-Fi Multimedia (WMM) Standard support, the adapter prioritizes different types of data. This feature ensures smoother streaming of real-time data such as videos, music, and Skype calls, providing a better multimedia experience.

4. Maintenance

- Keep the adapter clean and free from dust.
- Avoid exposing the adapter to extreme temperatures or humidity.
- Ensure the adapter is securely plugged into the USB port to prevent accidental disconnections.

5. Troubleshooting

5.1 No Wi-Fi Networks Detected

- Ensure the adapter is correctly inserted into a functional USB port.
- Verify that your computer's Wi-Fi is enabled in the network settings.
- Restart your computer and/or your wireless router.

- Check if other devices can detect Wi-Fi networks to confirm router functionality.

5.2 Slow Connection Speed

- Ensure the adapter is plugged into a USB 2.0 port for optimal performance.
- Move closer to your wireless router to improve signal strength.
- Reduce interference from other electronic devices (e.g., microwaves, cordless phones).
- Restart your router and modem.

5.3 Adapter Not Recognized

- Try plugging the adapter into a different USB port.
- For Windows 10, the adapter is typically driver-free. If issues persist, check Device Manager for unrecognized devices and consider manually updating drivers if available from the manufacturer's website.
- For other operating systems, ensure you have installed the correct drivers fromjee.li/drivers.
