Assembly Steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list and diagram.

4. **Insert Slats:** Place the slats (D) into the U-shaped slots on the side and center frames. Ensure they are evenly spaced and securely seated.
5. **Tighten All Connections:** Once all frame components and slats are in place, systematically tighten all bolts using the provided Allen wrench and small wrench. Ensure all connections are firm and secure to prevent noise and ensure stability.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Squeaking or Noise	Loose bolts or connections.	Check and tighten all bolts and screws on the frame. Ensure slats are properly seated in their U-shaped slots.
Instability or Wobbling	Uneven placement or loose frame components.	Ensure the box spring is on a flat, level surface. Verify all frame connections are securely tightened.
