SETUP AND ASSEMBLY INSTRUCTIONS

Assembly typically requires two adults. Please allow sufficient time and clear a spacious area for assembly. A Phillips head screwdriver and a hammer may be required (not included).

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches. Refer to the parts list in your included assembly guide to identify each piece.
2. **Assemble the Base Frame:** Begin by connecting the side panels to the bottom and back support panels using the designated hardware. Ensure all connections are snug and secure.
3. **Install the Middle Shelf and Vertical Dividers:** Attach the main middle shelf that sits above the toilet area. Then, install the vertical dividers for the side storage compartments.
4. **Attach the Top Section:** Secure the top cabinet frame to the assembled middle section. This forms the main structure of the unit.
5. **Insert Adjustable Shelves:** Place the adjustable shelves into the desired positions within the cabinet and side compartments. The shelf pins allow for height customization.
6. **Install Barn Door Hardware:** Mount the barn door track to the top front of the cabinet. Attach the rollers and handles to the barn doors.
7. **Hang Barn Doors:** Carefully hang the barn doors onto the track, ensuring they slide smoothly.
8. **Install Tissue Hook/Dispenser:** If your model includes a tissue hook or dispenser, install it into the designated side compartment.
9. **Position the Cabinet:** With assistance, carefully lift and position the assembled cabinet over your toilet. Ensure it is level and stable.
10. **Secure to Wall (Crucial):** Attach the anti-tip hardware to the top rear of the cabinet and secure it firmly to a wall stud. This step is critical for stability and safety.

- **Hardware:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Environment:** Avoid placing the cabinet in areas with extreme humidity or direct sunlight, which can cause warping or fading.

TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

- **Cabinet feels wobbly:** Ensure all assembly hardware is tightened. Verify the cabinet is level on the floor. Confirm the anti-tip kit is securely installed into a wall stud.
- **Barn doors do not slide smoothly:** Check the track for any obstructions. Ensure the rollers are properly seated on the track and are not damaged. Clean the track if necessary.
- **Missing parts:** Double-check the packaging and all corners for small hardware. If parts are genuinely missing, contact customer service with your model number and a description of the missing items.
