Safety Information

- Always ensure the sink is placed on a stable, level surface to prevent tipping.
- Do not exceed the maximum load capacity of 150 lbs.
- Ensure all water connections are secure to prevent leaks.
- Keep children and pets away from the sink during assembly and operation.
- Use appropriate tools and follow all assembly steps carefully.

Package Contents

Verify that all components are present before beginning assembly:

- Utility Sink Basin (Polypropylene)
- Legs (Polypropylene)
- Stainless Steel Faucet
- Hot & Cold Water Supply Lines (3/8" fittings)
- Drain Strainer with Stopper
- Drain Pipe (1 3/8-inch standard)
- Removable Drainboard
- Storage Shelf with Built-in Soap Box
- Adjustable Levelers (4)
- Assembly Hardware (Butterfly Nuts, Bolts)

Assembly and Setup

The VINGLI Utility Sink is designed for tool-free installation of the legs. The sink body is integrally formed, simplifying the process.

1. **Attach the Legs:** Align the sink legs with the designated slots on the bottom of the sink basin. Secure them using the provided butterfly nuts, tightening by hand until firm.
2. **Install the Faucet:** The faucet hole is pre-drilled. Insert the stainless steel faucet into the designated hole. Secure it from underneath with the provided hardware.
3. **Connect Water Supply Lines:** Attach the hot and cold water supply lines to the faucet. Connect the other ends to your 3/8" water supply valves. Ensure connections are tight to prevent leaks.
4. **Install Drain Assembly:** Place the drain strainer with stopper into the sink's drain opening. Connect the drain pipe to the bottom of the strainer. Route the drain pipe to your desired drainage point (e.g., floor drain, bucket, or existing plumbing).
5. **Add Storage Shelf and Drainboard:** Place the storage shelf into the lower section of the legs. Position the removable drainboard on the rim of the sink as desired.
6. **Adjust Levelers:** If the sink is on an uneven surface, adjust the four levelers at the bottom of the legs to ensure stability.

Operation

The VINGLI Utility Sink is designed for versatile use in various environments.

- **Water Flow:** Use the faucet handle to control water temperature (hot/cold) and flow. The faucet features a 360° rotatable nozzle for convenience.
- **Drainage:** The sink bottom is slightly sunken towards the drain to facilitate quick and thorough drainage. Use the stopper to fill the basin when needed.
- **Removable Drainboard:** Utilize the removable drainboard for temporarily placing items such as soap, brushes, or small tools.
- **Storage Shelf:** The perforated storage shelf below the sink is ideal for keeping detergents, cleaning supplies, or other items off the floor and dry.
- **Pet Washing:** The spacious basin is suitable for bathing small to medium-sized pets. Ensure the pet is secure and comfortable during washing.

Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your utility sink.

- **Cleaning the Sink:** Wipe the sink basin and legs with a dry cloth after each use to prevent water spots and residue buildup. For deeper cleaning, use mild soap and water with a soft cloth or sponge. Avoid abrasive cleaners or harsh chemicals that may damage the polypropylene material.
- **Faucet Care:** Clean the stainless steel faucet with a soft cloth and mild, non-abrasive cleaner. Periodically check for mineral buildup around the nozzle and clean as necessary.
- **Drain Maintenance:** Regularly remove the drain stopper and clean any debris from the drain strainer to ensure proper water flow and prevent clogs.
- **Check Connections:** Periodically inspect all water supply and drain connections for any signs of leaks or loosening. Tighten as needed.

Troubleshooting

If you encounter any issues with your VINGLI Utility Sink, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water Leakage	Loose connections, damaged seals.	Check and tighten all water supply and drain connections. Inspect seals and replace if damaged.
Slow Drainage	Clogged drain strainer or pipe.	Remove drain stopper and clean any debris from the strainer. Clear any blockages in the drain pipe.
Unstable Sink	Uneven floor, loose leg connections.	Adjust the four levelers at the bottom of the legs. Ensure all leg butterfly nuts are securely tightened.
No Water Flow	Water supply turned off, clogged faucet aerator.	Ensure water supply valves are fully open. Remove and clean the faucet aerator.
