KZZI K68 PRO + K20

K68 Pro Gaming Keyboard Instruction Manual

Brand: KZZI | Model: K68 PRO + K20

PRODUCT OVERVIEW

The KZZI K68 Pro Gaming Keyboard is a compact wireless mechanical keyboard designed for versatility and performance. It features a 65% layout, gasket-mounted design, hot-swappable switches, and vibrant RGB backlighting. This kit also includes an independent K20 numeric keypad for enhanced productivity.

This keyboard offers multiple connectivity options including 2.4GHz wireless, Bluetooth 5.0, and USB-C wired connection, making it compatible with Windows and Mac operating systems.

INITIAL SETUP

Powering On

Ensure both the K68 Pro keyboard and K20 numeric keypad are charged. Connect the provided USB-C cable to the keyboard/keypad and a power source (e.g., computer USB port or wall adapter).

Connectivity Modes

The K68 Pro keyboard and K20 numeric keypad support three connection modes:

- 2.4GHz Wireless:** Insert the 2.4GHz USB dongle (located in the keyboard's bottom compartment or keypad's bottom compartment) into your computer's USB port. Switch the mode dial/switch on the device to 2.4G mode.
- Bluetooth 5.0:** Switch the mode dial/switch on the device to Bluetooth mode. For the K68 Pro, you can pair up to three Bluetooth devices. Select the desired Bluetooth channel (BT1, BT2, or BT3) using the dial. On your computer or device, search for "KZZI K68 Pro" or "KZZI K20" in Bluetooth settings and pair.
- USB-C Wired:** Connect the device directly to your computer using the provided USB-C cable. The

device will automatically switch to wired mode.

OPERATING YOUR KEYBOARD

RGB Backlight Control

The K68 Pro features customizable RGB backlighting. Use the function keys (Fn combinations) to cycle through various lighting effects, adjust brightness, and change colors. Refer to the user manual for specific key combinations.

Hot-Swappable Switches

The K68 Pro supports full-key hot-swappable switches (3-pin or 5-pin compatible). You can easily remove and replace switches using the provided switch puller without soldering.

MAINTENANCE AND CARE

Cleaning

Use a soft, dry cloth to clean the keyboard and keypad surfaces. For deeper cleaning, remove keycaps using the keycap puller and use compressed air to clear debris.

Switch Replacement

If a switch malfunctions or you wish to change the typing feel, use the switch puller to gently remove the old switch and insert a new compatible switch. Ensure the pins align correctly before pressing down.

TROUBLESHOOTING

Connectivity Issues

- **Device not connecting:** Ensure the device is charged and the mode switch/dial is set to the correct position (2.4G, BT1/2/3, or Wired). Try re-pairing the Bluetooth connection or re-inserting the 2.4GHz dongle.
- **Intermittent connection:** Move the device closer to your computer. Avoid interference from other wireless devices.

Backlight Issues

- **Backlight not working:** Check brightness settings using Fn key combinations. Ensure the device is charged.
- **Incorrect colors/effects:** Cycle through lighting modes using Fn key combinations.

Key Functionality

- **Keys not responding:** Try replacing the switch for the non-responsive key. Ensure the keyboard is in the correct operating system mode (Windows/Mac).
- **ALT shortcuts not working as expected (Gaming):** Some users have reported issues with ALT + number key shortcuts in certain games. This functionality may be tied to system-level shortcuts and might not be directly configurable on the keyboard.
