VACASSO W05

VACASSO W05 Portable Carpet & Upholstery Spot Cleaner Instruction Manual

Model: W05

INTRODUCTION

Thank you for choosing the VACASSO W05 Portable Carpet & Upholstery Spot Cleaner. This machine is designed to effectively remove stubborn spots and stains from carpets, upholstery, and car interiors. Featuring a powerful 500W motor and 18 Kpa suction, it provides a comprehensive cleaning experience. Please read this manual thoroughly before operation to ensure safe and efficient use.

SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, or injury. Read all instructions before using this appliance. Do not leave the appliance unattended when plugged in. Unplug from outlet when not in use and before servicing. Use only as described in this manual. Use only manufacturer's recommended attachments.

PACKAGE CONTENTS

Verify that all items are included in your package:

- Main body of the carpet cleaner
- 3.5" Tough Stain Tool
- 6.5" Wide Path Tool
- Storage Hook with a screw
- User Manual

SETUP

- 1. Attach the Brush Head:** Select either the 3.5" tough stain tool or the 6.5" wide path tool. Align the tool with the hose connector and push until it clicks into place. Ensure it is securely fastened.
- 2. Fill the Clean Water Tank:** Locate the clean water tank (37 oz capacity) on the machine. Press the release button and lift the tank. Open the cap, fill with clean water (and non-bubble detergent if desired, for stubborn stains), and close the cap securely. Reinsert the tank into the machine until it locks.
- 3. Install Storage Hook:** Use the provided screw and a screwdriver to attach the storage hook to the designated area on the machine. This hook is used for convenient storage of the brush and power cord.

OPERATING INSTRUCTIONS

The VACASSO W05 operates with a simple spray, scrub, and suction method to remove stains.

- 1. Power On:** Plug the power cord into a suitable electrical outlet. Press the power button on the top of the unit to turn it on.
- 2. Spray Solution:** Hold the selected brush tool over the stained area. Press the trigger on the handle to spray cleaning solution onto the stain. For stubborn stains, allow the solution to sit for a few minutes before proceeding.
- 3. Scrub the Stain:** Gently scrub the stained area with the brush bristles of the tool. The bristles are designed to agitate the stain without damaging the fabric.
- 4. Suction Dirty Water:** Release the spray trigger and slowly pull the tool over the treated area to suction up the dirty water and loosened debris. Repeat as necessary until the stain is removed and the area is as dry as possible.
- 5. Using Different Tools:** The 3.5" tough stain tool is ideal for concentrated spots and tight areas like car seats. The 6.5" wide path tool is suitable for larger areas on carpets and upholstery.

Strong Spray and Suction

Effectively remove stubborn and lasting stains

MAINTENANCE

- 1. Emptying the Dirty Water Tank:** When the dirty water tank (27 oz capacity) is full, or after each use, remove it from the machine. Open the tank and pour out the dirty water.
- 2. Cleaning Tanks and Tools:** Rinse both the clean and dirty water tanks thoroughly with clean water. Clean the brush tools by running clean water through them or scrubbing with a small brush. Ensure all components are dry before reassembling.
- 3. Storing the Machine:** Wrap the power cord around the designated bracket on the machine. Store the hose and selected brush tool on the integrated hook for compact storage.

TROUBLESHOOTING

If you encounter any issues with your VACASSO W05, please refer to the troubleshooting checks provided on the seventh page of the original user manual. Common issues may include:

- **No Suction:** Ensure the dirty water tank is not full and the brush intake is properly connected to the hose.
- **No Spray:** Check if the clean water tank is filled and properly seated. Ensure the spray nozzle is not clogged.
- **Reduced Performance:** Clean all tanks and tools thoroughly. Ensure no blockages in the hose or nozzle.
