

BOBLOV KJ25

BOBLOV KJ25 Body Camera User Manual

Model: KJ25
Brand: BOBLOV

1. PRODUCT OVERVIEW

The BOBLOV KJ25 Body Camera is a versatile recording device designed for various applications, including law enforcement, security, and outdoor activities. It captures high-resolution video and photos, features night vision capabilities, and offers extended recording times with its built-in battery.

Key Features:

- **Video Resolution:** Up to 1440P for clear footage.
- **Photo Resolution:** Up to 58 Megapixels.
- **Battery Life:** Integrated 3000mAh battery provides up to 13 hours of video recording with audio.
- **Night Vision:** Equipped with IR lights for recording in low-light or dark environments.
- **Storage:** Supports external Micro SD cards from 64GB to 512GB (max).
- **Pre/Post-Recording:** Captures events before and after the main recording for comprehensive evidence.
- **Portability:** Designed to be worn on the body, with included clips for shoulder or chest attachment.

Package Contents:

What You Will Receive?

Image: Contents of the BOBLOV KJ25 Body Camera package, including the camera, user manual, USB-C cable, short 360° back clip, and long 360° shoulder clip.

- 1 x BOBLOV KJ25 Body Camera
- 1 x Short 360° Back Clip
- 1 x Long 180° Shoulder Clip
- 1 x USB Cable (USB-C)
- 1 x User Manual

2. SETUP

2.1 Initial Charging

Before first use, fully charge the BOBLOV KJ25 Body Camera. Connect the provided USB-C cable to the camera's charging port and the other end to a USB power adapter (not included) or a computer's USB port. The charging indicator light will show the charging status.

Image: The BOBLOV KJ25 Body Camera being charged via its USB-C port, illustrating the built-in 3000mAh battery.

- **Charging Time:** Approximately 5 hours for a full charge.
- **Battery Life:** Up to 13 hours of recording on a full charge.

2.2 Inserting a Micro SD Card

The camera supports external Micro SD cards from 64GB to 512GB. Ensure the camera is powered off before inserting or removing the SD card. Locate the SD card slot, typically protected by a rubber flap, and gently insert the card until it clicks into place.

Note: The camera does not come with an SD card. A high-speed (Class 10 or U3) Micro SD card is recommended for optimal performance.

2.3 Attaching the Camera

Use the provided clips to attach the camera to your clothing or gear. The short 360° back clip is suitable for belt or pocket attachment, while the long 180° shoulder clip is ideal for shoulder or chest mounting, allowing for hands-free operation.

3. OPERATING INSTRUCTIONS

3.1 Power On/Off

- **To Power On:** Press and hold the Power button until the indicator light turns on and the screen displays the startup interface.
- **To Power Off:** Press and hold the Power button until the indicator light turns off and the screen shuts down.

3.2 Video Recording

To start video recording, press the Video Record button. The recording indicator will flash, and the screen will show the recording duration. Press the Video Record button again to stop recording. Videos are saved automatically to the Micro SD card.

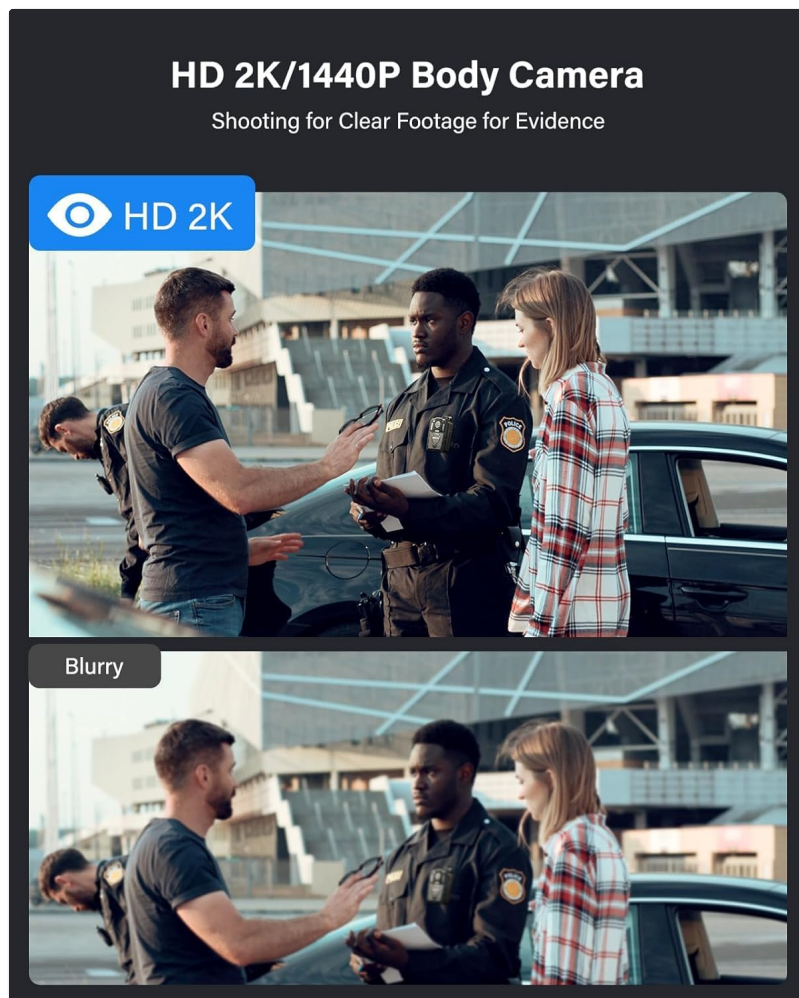

Image: A visual comparison demonstrating the clear 2K/1440P video quality of the BOBLOV KJ25 Body Camera, showing sharp details compared to a blurry image.

The camera supports 1440P video resolution, ensuring clear footage for evidence or personal use. It also features pre/post-recording functionality to capture events leading up to and following the main recording.

3.3 Photo Capture

To take a photo, press the Photo button. The camera will capture a still image and save it to the Micro SD card. The camera supports up to 58 Megapixel photo resolution.

3.4 Night Vision Mode

The BOBLOV KJ25 is equipped with infrared (IR) lights for night vision. To activate night vision, locate the dedicated Night Vision button or access it through the camera's menu settings. When activated, the camera will automatically switch to black and white recording/capture in low-light conditions.

3.5 Playback

To review recorded videos or photos, enter playback mode via the camera's menu. Use the navigation buttons to browse through files. Select a file to play back videos or view photos on the camera's screen. You can also connect the camera to a computer using the USB cable to transfer and view files.

4. MAINTENANCE

4.1 Cleaning

- Use a soft, dry cloth to clean the camera body.
- For the lens, use a specialized lens cleaning cloth and solution to avoid scratches.
- Do not use harsh chemicals or abrasive cleaners.

4.2 Storage

- Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- If storing for an extended period, ensure the battery is partially charged (around 50%) to prolong its lifespan.
- Keep the camera away from dust and moisture.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Battery is depleted.	Charge the camera fully.

Problem	Possible Cause	Solution
Cannot record video/take photos.	No Micro SD card inserted or card is full/corrupted.	Insert a valid Micro SD card, format the card, or delete old files.
Poor video/photo quality.	Lens is dirty; insufficient lighting; incorrect settings.	Clean the lens; ensure adequate lighting or activate night vision; check resolution settings.
Camera freezes or becomes unresponsive.	Software glitch; battery issue.	Perform a soft reset (if available, refer to manual for specific button combination) or let the battery drain and recharge.
