Key Features

- **Stylish Upholstered Headboard:** The headboard is crafted from high-quality linen fabric with a high-resilience memory foam interior. Button tufting provides a refined aesthetic.
- **Robust Frame Construction:** A heavy-duty metal frame combined with 12 solid wood slats forms a central support structure, capable of supporting up to 800 lbs. Smooth, solid wood feet are designed to prevent floor damage.
- **Adjustable Headboard Height:** The headboard height can be adjusted between 41.7 and 47.7 inches, accommodating mattresses with a thickness of 4 to 12 inches.
- **Noise-Free Design:** Equipped with quiet straps on the bed frame to minimize noise and rattling, ensuring a peaceful sleep environment.
- **Under-Bed Storage:** Provides 7.8 inches of clearance beneath the frame, offering convenient space for storing various items.
- **No Box Spring Required:** The sturdy wooden slat system eliminates the need for a traditional box spring, allowing your mattress to rest directly on the frame.

Setup and Assembly Instructions

This bed frame is designed for straightforward assembly. It is recommended to have two people for assembly. Please follow these steps carefully:

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface (e.g., a rug or blanket) to prevent scratches. Identify each part by comparing it to the provided parts list in the assembly kit.
2. **Assemble Frame Sections:** Attach the side rails to the headboard and footboard using the designated hardware. Ensure all connections are aligned correctly. Do not fully tighten screws until all major frame components are loosely connected.
3. **Install Support Beams:** Secure the central support beam(s) and any additional support legs to the frame.
4. **Place Wooden Slats:** Position the wooden slats evenly across the frame. The slats are designed to fit securely and may feature hook-and-loop fasteners or EVA foam for noise reduction.
5. **Tighten All Connections:** Once the entire frame is assembled and appears stable, fully tighten all screws and bolts using the provided tools.
6. **Position Mattress:** Place your mattress directly onto the wooden slats. A box spring is not required for this platform bed frame.

Maintenance

- **Cleaning the Upholstered Headboard:** For general cleaning, gently vacuum the fabric. For spills or stains, spot clean immediately with a clean, damp cloth and a mild, pH-neutral detergent. Blot the area; do not rub vigorously. Allow to air dry completely. Avoid using harsh chemicals or abrasive cleaners.
- **Frame Cleaning:** Wipe metal and wood components with a dry or slightly damp cloth to remove dust and debris.
- **Regular Inspection:** Periodically (e.g., every 3-6 months) check all screws, bolts, and connections to ensure they remain tight. Re-tighten as needed to maintain the bed frame's stability and prevent any potential noise.
- **Adhere to Weight Capacity:** Always respect the maximum weight capacity of 800 lbs for full and queen sizes, and 500 lbs for twin size, to ensure product longevity and user safety.

Troubleshooting

- **Squeaking Noises:**
  - Check all bolts and screws for tightness. Loose connections are a common cause of squeaking.
  - Ensure wooden slats are properly seated within the frame and that any noise-reducing EVA foam or straps are intact and correctly positioned.
- **Instability or Wobbling:**
  - Verify that all support legs are firmly attached and making even contact with the floor. Adjust if necessary.
  - Re-check all frame connections for proper assembly and tightness. Disassemble and reassemble if any part appears misaligned.
- **Headboard Height Adjustment Issues:**
  - If the headboard is not at the desired height, ensure the adjustment bolts are loosened before attempting to reposition it, then securely tighten them once the desired height is achieved.
- **Missing Parts:**

- If any parts are missing upon unboxing, please refer to the "Warranty and Customer Support" section to contact customer service for assistance.
