1. INTRODUCTION

This manual provides instructions for the installation, usage, and maintenance of your RuenTech silicone smart watch bands. These bands are designed for compatibility with various P66 series smartwatches, offering a comfortable and durable alternative to original straps.

2. SETUP AND INSTALLATION

The RuenTech smart watch bands feature quick-release spring bars for easy attachment and removal. Follow these steps to install or replace your watch band:

- 1. Prepare the Watch:** Ensure your smartwatch is clean and free of debris where the band attaches.
- 2. Remove Existing Band (if applicable):** Locate the small lever or pin on the underside of your current watch band where it connects to the watch lug. Slide the lever to retract the spring bar and gently pull the band away from the watch. Repeat for the other side.
- 3. Attach New Band:**
 - Insert one end of the new band's spring bar into one of the lug holes on the watch.
 - Slide the quick-release lever on the spring bar to retract the other end.
 - Position the band against the watch lug and release the lever, allowing the spring bar to snap into the opposite lug hole.
 - Gently tug on the band to ensure it is securely fastened.
- 4. Repeat for the Second Half:** Follow the same procedure for the other half of the watch band.

Figure 2: Example of RuenTech bands, including one installed on a compatible smartwatch.

3. OPERATING AND USAGE

These silicone bands are designed for comfort and versatility, suitable for daily wear and various activities.

3.1 Adjustable Size

The bands feature multiple adjustment holes and a traditional tang buckle, allowing for a customizable fit. They are designed to fit wrists with a circumference ranging from 5.5 inches to 8.7 inches.

3.2 Comfort and Material

Constructed from premium silicone rubber, the bands are skin-friendly, lightweight, and water-resistant. This makes them suitable for high-intensity sports such as mountain climbing, outdoor exercise, swimming, cycling, and long-distance running.

4. MAINTENANCE

Proper care will extend the life and appearance of your RuenTech watch bands.

- **Cleaning:** Regularly clean your band with mild soap and water. Rinse thoroughly and dry with a soft cloth. Avoid harsh chemicals or abrasive materials.
- **Drying:** Ensure the band is completely dry before reattaching it to your wrist, especially after swimming or intense exercise, to prevent skin irritation.
- **Storage:** When not in use, store bands in a cool, dry place away from direct sunlight to prevent material degradation.

5. TROUBLESHOOTING

- **Band Not Attaching Securely:**

Ensure the quick-release spring bars are fully engaged in the watch lug holes. Check for any obstructions in the lug holes or damage to the spring bar. If the spring bar is bent or damaged, it may need replacement.

• **Skin Irritation:**

Ensure the band is clean and dry. Adjust the tightness; a band that is too tight or too loose can cause irritation. If irritation persists, discontinue use and consult a healthcare professional.

• **Discoloration:**

Exposure to certain chemicals (e.g., sunscreens, perfumes) or prolonged direct sunlight can cause discoloration. Follow maintenance guidelines to minimize this risk.

6. SPECIFICATIONS

Feature	Specification
Brand	RuenTech
Material	Premium Silicone Rubber
Clasp Type	Tang Buckle (Stainless Steel)
Adjustable Size	Fits wrists 5.5 inches - 8.7 inches (140mm - 220mm)
