

Zettum BC-S-2-N-BLK

Zettum Bike Cover for 2 Bikes

INSTRUCTION MANUAL - MODEL: BC-S-2-N-BLK

Introduction

Thank you for choosing the Zettum Bike Cover. This heavy-duty, waterproof cover is designed to provide superior protection for up to two stationary bicycles, safeguarding them from various outdoor elements. This manual provides essential information for the proper setup, operation, and maintenance of your bike cover to ensure its longevity and optimal performance.

Setup

Before covering your bikes, ensure they are clean and free of sharp edges that could potentially damage the cover. The Zettum XL 2-Bike Stationary Cover measures 82 inches (L) x 38 inches (W) x 47 inches (H).

1. **Bike Arrangement:** For optimal coverage, arrange your two bikes side by side or upside down. Ensure handlebars and pedals are positioned to minimize protrusions.
2. **Draping the Cover:** Carefully drape the cover over both bicycles, ensuring it fully encompasses them from top to bottom.
3. **Securing Buckles:** Locate the three quick-release buckles on the cover. Fasten these buckles securely around the bikes or bike stand to prevent the cover from being blown away by wind.
4. **Utilizing Lock Holes:** The cover features two additional lock holes (one at the front wheel area, one at the rear wheel area). These are designed to allow for the use of a bicycle lock (not included) for enhanced security.
5. **Adjusting Drawstrings:** Tighten the integrated drawstrings cord at the bottom hem of the cover to ensure a snug fit around the base of the bikes, further preventing wind uplift and debris entry.

Operating the Cover

The Zettum Bike Cover is designed for ease of use and comprehensive protection. Its 600D Oxford cloth with PU coating provides robust defense against various environmental factors.

- **All-Weather Protection:** Once properly installed, the cover protects your bikes from:
 - Sunlight (UV rays)
 - Rain and Snow
 - Wind and Dust
 - Tree Resin, Leaves, and Debris
 - Bird Droppings
- **Easy Application and Removal:** The cover is designed for simple application and removal. For best results, ensure bikes are arranged as described in the Setup section.

- **Wind Resistance:** The combination of elasticized hems and the three quick-release buckles ensures the cover remains securely in place even during strong winds.

Maintenance

Proper care will extend the life of your Zettum Bike Cover and ensure continued protection for your bicycles.

- **Cleaning:** Use the included cleaning cloth or a soft, damp cloth to wipe down the cover periodically. For more stubborn dirt, a mild soap solution can be used. Rinse thoroughly with water and allow to air dry completely before storage or re-use. Do not machine wash or tumble dry.
- **Storage:** When not in use, fold the cover neatly and store it in the provided portable storage bag in a cool, dry place away from direct sunlight.
- **Inspection:** Regularly inspect the cover for any signs of wear, tears, or damage. Address minor issues promptly to prevent them from worsening.

Troubleshooting

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Cover blows off in wind	Buckles not fastened, drawstrings not tightened, or improper bike arrangement.	Ensure all three quick-release buckles are securely fastened. Tighten the bottom drawstrings for a snug fit. Verify bikes are arranged to allow the cover to fully enclose them.
Water pooling on top or inside cover	Improper draping creating depressions, or extreme weather conditions exceeding waterproof rating.	Ensure the cover is draped tautly to prevent water accumulation. If pooling occurs, gently lift the cover to drain water. While highly waterproof, prolonged exposure to extreme standing water may test its limits.

Problem	Possible Cause	Solution
Tears or rips in the fabric	Sharp edges on bikes, improper handling, or excessive force during installation/removal.	Before covering, ensure no sharp points on bikes are exposed. Handle the cover carefully. While tear-resistant, extreme abrasion or sharp impacts can cause damage.
Cover fading over time	Prolonged exposure to intense UV radiation.	The cover is fading-resistant and designed to withstand UV aging for at least 3 years. This is normal wear over extended periods. Ensure proper cleaning and storage when not in use.
Cover not fitting two bikes	Bikes are too large for the XL 2-Bike size, or improper arrangement.	Verify your bike dimensions against the cover's specifications (82" L x 38" W x 47" H). Ensure bikes are arranged side-by-side or upside down for best fit. Consider a larger size if your bikes are exceptionally large.

Important Note: This Zettum Bike Cover is specifically designed for **stationary** use. It is not intended for use during bicycle transportation on vehicles at highway speeds, as this can lead to premature wear or damage to the cover and potential safety hazards.

Specifications

Feature	Detail
