

## ESPA Cooling Body Moisturiser 200ml

# ESPA Cooling Body Moisturiser 200ml Instruction Manual

Model: Cooling Body Moisturiser 200ml

## 1. INTRODUCTION

The ESPA Cooling Body Moisturiser is formulated to provide hydration and a refreshing sensation to the skin. This 200ml cream-gel moisturiser contains key ingredients such as Hyaluronic Acid and Aloe Vera, designed to support skin moisture balance and provide a soothing effect. This manual provides essential information for the proper use and care of your product.

## 2. PRODUCT OVERVIEW

Image 1: Front view of the ESPA Cooling Body Moisturiser 200ml tube.

The ESPA Cooling Body Moisturiser is a light cream-gel designed for daily body hydration. Its formulation aims to leave skin feeling refreshed and moisturised. The product is packaged in a 200ml tube for convenient application.

### Key Ingredients:

- **Hyaluronic Acid:** Known for its ability to attract and retain moisture, contributing to skin hydration.
- **Aloe Vera:** Recognized for its soothing and cooling properties, helping to calm the skin.

## 3. SETUP AND PREPARATION

Before applying the moisturiser, ensure your skin is clean and dry. For optimal results, apply after showering or bathing when the skin is still slightly damp, as this can help lock in moisture.

1. **Cleanse Skin:** Gently cleanse the body with your preferred body wash.
2. **Pat Dry:** Lightly pat your skin dry with a towel, leaving it slightly moist.

## 4. OPERATING INSTRUCTIONS (APPLICATION)

---

Follow these steps for effective application of the ESPA Cooling Body Moisturiser:

1. **Dispense Product:** Squeeze a suitable amount of moisturiser into your palm. The amount may vary depending on the area of application and personal preference.
2. **Apply to Skin:** Gently massage the moisturiser onto your body using upward, circular motions. Focus on areas that require extra hydration or a cooling sensation.
3. **Allow Absorption:** Allow the product to fully absorb into the skin before dressing. This typically takes a few minutes.

Image 2: Illustrative image of a hand applying body moisturiser to the skin.

For daily use, apply as needed to maintain skin hydration and a refreshed feeling.

## 5. MAINTENANCE AND STORAGE

---

Proper storage ensures the longevity and effectiveness of your moisturiser.

- **Storage Conditions:** Store in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Container Care:** Keep the cap tightly closed when not in use to prevent contamination and drying out.
- **Shelf Life:** Refer to the 'period after opening' (PAO) symbol on the product packaging, typically indicated by an open jar icon with a number followed by 'M' (e.g., 12M for 12 months).

## 6. TROUBLESHOOTING

---

If you encounter any issues while using the product, consider the following:

- **Skin Irritation:** If redness, itching, or irritation occurs, discontinue use immediately. Cleanse the affected area with water. If symptoms persist, consult a healthcare professional.
- **Product Consistency:** Ensure the product has been stored correctly. Extreme temperatures can sometimes affect

consistency.

- **Ineffective Cooling/Hydration:** Ensure sufficient product is applied and massaged thoroughly into the skin. Consistent daily use is recommended for best results.

## 7. SPECIFICATIONS

Attribute	Detail
Product Name	ESPA Cooling Body Moisturiser
Volume	200 Milliliters (6.7 US fl. oz.)
Key Ingredients	Hyaluronic Acid, Aloe Vera
Formulation	Light Cream-Gel
