Aeitto WBJ15NC

Aeitto Nugget Ice Maker Countertop

USER MANUAL - MODEL WBJ15NC

1. Introduction

Thank you for choosing the Aeitto Nugget Ice Maker Countertop. This manual provides essential information for the safe operation, installation, maintenance, and troubleshooting of your new ice maker. Please read it thoroughly before use and retain it for future reference.

This appliance is designed to produce chewable nugget ice efficiently, suitable for various beverages and occasions. With proper care, your Aeitto ice maker will provide reliable service for years.

2. Safety Instructions

To reduce the risk of fire, electric shock, or injury when using your ice maker, follow these basic precautions:

- Read all instructions before use.
- Connect to a properly grounded outlet only.
- Do not immerse the power cord, plug, or any part of the appliance in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug the ice maker from the outlet when not in use, before cleaning, and before servicing.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Do not use outdoors.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Ensure proper ventilation around the unit. Maintain at least 5 inches of clearance on all sides.
- Use only potable water.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

3. Product Overview

Image: The Aeitto Nugget Ice Maker Countertop, showing its sleek design, the ice basket filled with nugget ice, and a glass of iced beverage with an ice scoop.

Components:

- **Ice Maker Unit:** Main body housing the compressor and water reservoir.
- **Ice Basket:** Removable basket for collecting produced ice.
- **Ice Scoop:** For convenient ice retrieval.
- **Control Panel:** Located on the top, with indicator lights and buttons.
- **Water Reservoir:** Internal tank for water supply.
- **Drain Plug:** Located at the bottom for water drainage.

Control Panel Indicators:

- **MAKING ICE:** Illuminates when the unit is actively producing ice.
- **ICE FULL:** Illuminates when the ice basket is full, indicating ice production will pause.
- **ADD WATER:** Illuminates when the water reservoir needs refilling.
- **CLEAN (Hold for 3 Sec):** Button to initiate the self-cleaning cycle.

- **POWER:** Button to turn the unit on or off.

4. Setup

1. **Unpacking:** Carefully remove all packaging materials. Inspect the ice maker for any damage.
2. **Placement:** Place the ice maker on a flat, stable, and level surface, away from direct sunlight and heat sources. Ensure at least 5 inches of clearance on all sides for proper ventilation.
3. **Initial Cleaning:** Before first use, clean the interior of the ice maker. Refer to the "Maintenance" section for detailed cleaning instructions.
4. **Power Connection:** Plug the power cord into a grounded electrical outlet.
5. **First Use Recommendation:** For optimal performance, allow the unit to stand upright for at least 2 hours before plugging it in, especially if it was transported horizontally. Discard the first few batches of ice to ensure cleanliness.

5. Operating Instructions

1. **Add Water:**
 - **Manual Fill:** Open the lid and pour potable water into the water reservoir until it reaches the MAX fill line. Do not overfill.
 - **Water Connection (if applicable):** If your model supports a direct water connection, ensure it is properly installed and connected to a filtered water supply according to the separate installation guide for the water line.
2. **Start Ice Production:** Press the "POWER" button. The "MAKING ICE" indicator will illuminate, and the ice-making cycle will begin. The first batch of ice typically takes about 5 minutes.
3. **Automatic Cycle:** The ice maker operates in an automatic cycle. When the ice basket is full, the "ICE FULL" indicator will light up, and ice production will pause. It will resume automatically after approximately 30 minutes if the ice level drops below the sensor.
4. **Add Water Indicator:** If the "ADD WATER" indicator illuminates, the water reservoir is low. Refill the reservoir as described in step 1. The unit will automatically resume ice production once water is added.
5. **Collecting Ice:** Use the provided ice scoop to remove ice from the basket. For best results, transfer ice to a freezer for storage as the ice maker is not a freezer and will melt ice over time.
6. **Protecting the Unit:** If the unit is turned off and then turned on again within 3 minutes, it will first run a 5-minute water pump cleaning cycle to protect the internal components before resuming ice production.
7. **Turning Off:** Press the "POWER" button to turn off the ice maker.

6. Maintenance

Regular cleaning and maintenance are crucial for the longevity and hygiene of your ice maker.

Daily Care:

- Empty the ice basket and wipe it clean with a soft cloth.
- If not using the ice maker for an extended period, drain the water reservoir.

Self-Cleaning Function:

It is recommended to perform an automatic cleaning at least once a week to maintain fresh-tasting ice.

1. Ensure the water reservoir is filled with clean water.
2. Press and hold the "CLEAN" button for 3 seconds. The unit will begin a self-cleaning cycle.
3. The cleaning cycle will run for several minutes. Once complete, drain the water from the reservoir using the drain plug at the bottom of the unit.
4. Rinse the reservoir with fresh water and drain again to remove any cleaning residue.

Draining Water:

To drain the water from the reservoir:

1. Unplug the ice maker from the power outlet.
2. Place a bucket or large container under the drain plug located at the bottom of the unit.
3. Remove the drain plug to allow water to flow out.
4. Once all water has drained, replace the drain plug securely.

Long-Term Storage:

If the ice maker will not be used for an extended period:

- Perform a self-cleaning cycle and drain all water.
- Ensure the interior is completely dry to prevent mold or mildew growth.
- Store the unit in a cool, dry place, away from direct sunlight.

7. Troubleshooting

Review the following common issues and solutions before contacting customer support.

Problem	Possible Cause	Solution
Ice maker does not turn on.	No power; Power cord not plugged in.	Ensure the unit is plugged into a grounded outlet. Check the circuit breaker.
"ADD WATER" indicator is on.	Water reservoir is empty or low.	Fill the water reservoir with potable water.
"ICE FULL" indicator is on.	Ice basket is full; Ice is blocking the sensor.	Remove ice from the basket. Redistribute ice if it's piled up.
No ice production or very little ice.	Insufficient water; Ambient temperature too high; Air vents blocked.	Check water level. Ensure unit is in a cool, well-ventilated area. Clear any obstructions from vents.
Ice tastes bad or has an odor.	Unit needs cleaning; Stale water.	Perform a self-cleaning cycle. Use fresh, potable water. Drain and clean regularly.

8. Specifications

Feature	Detail
Model Name	WBJ15NC
Product Dimensions (D x W x H)	16.9" x 9.84" x 16.9"
Ice Basket Capacity	3.2 lbs
Water Tank Capacity	3.6 L
Daily Ice Production	Up to 55 lbs/day
Voltage	115 Volts
Manufacturer	Aeitto

9. Warranty and Support

The Aeitto Nugget Ice Maker Countertop comes with a one-year after-sales service warranty from the date of purchase. This warranty covers defects in materials and workmanship under normal use.

For warranty claims, technical support, or any questions regarding your product, please contact Aeitto customer service. Please have your model number (WBJ15NC) and proof of purchase ready when contacting support.

Customer Support: Refer to your purchase documentation or the official Aeitto website for contact information.
