2. SAFETY INFORMATION

WARNING: Failure to follow these safety instructions could result in injury or property damage.

- Always follow assembly instructions carefully.
- Secure the vanity to the wall using appropriate anchoring hardware to prevent tip-over.
- Keep children and pets away from the assembly area.
- Use caution when handling heavy components, especially the ceramic sink. Two people are recommended for lifting.
- Ensure all connections for plumbing are secure and watertight to prevent leaks.
- Do not overload drawers or shelves.
- Avoid using harsh chemicals or abrasive cleaners on any part of the vanity.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

5. SETUP AND ASSEMBLY

Assembly is required for this vanity. Please follow the step-by-step instructions provided in the included assembly guide. The following is a general overview.

5.1 Tools Required (Not Included)

- Phillips Head Screwdriver
- Flat Head Screwdriver
- Adjustable Wrench
- Level
- Drill (for wall anchors)
- Silicone Sealant (for sink installation)

5.2 Assembly Steps

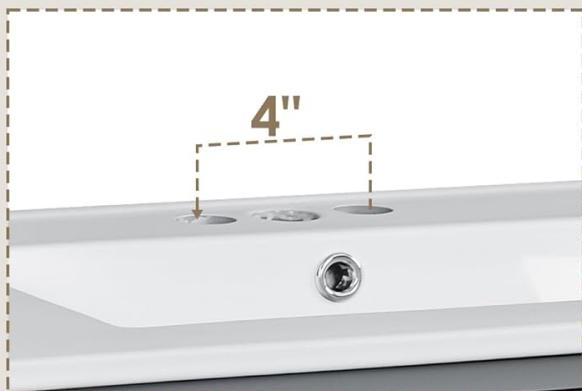

- 1. Unpack and Inspect:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Verify all parts against the parts list in your detailed assembly guide.
- 2. Assemble Cabinet Frame:** Follow the specific instructions to connect the side panels, back panel, and base of the vanity cabinet using the provided hardware (cam locks, dowels, screws). Ensure all

connections are tight and the frame is square.

3. **Install Drawer Slides:** Attach the drawer slides to the cabinet interior according to the guide. Ensure they are level and properly aligned for smooth drawer operation.
4. **Assemble Drawers:** If drawers are not pre-assembled, follow instructions to put them together and attach the drawer fronts and handles. Insert the assembled drawers onto the slides.
5. **Install Cabinet Door:** Attach the soft-closing hinges to the cabinet door and then to the cabinet frame. Adjust hinges as needed for proper door alignment. Install the cabinet door organizer if it is a separate component.
6. **Place Sink Top:** Carefully place the ceramic sink top onto the assembled vanity cabinet. Apply a bead of silicone sealant around the top edge of the cabinet where the sink will rest to secure it and prevent water infiltration.
7. **Install Faucet and Drain:** Install your chosen faucet and drain assembly into the pre-drilled holes on the ceramic sink top. Follow the manufacturer's instructions for your specific faucet and drain.
8. **Connect Plumbing:** Connect the water supply lines to the faucet and the drain pipe to the P-trap. Ensure all connections are hand-tightened, then use a wrench for a final snug turn. Check for leaks after turning on the water supply.
9. **Secure to Wall:** Position the vanity against the wall. Use a level to ensure it is straight. Mark the locations for wall anchors through the vanity's back panel. Drill pilot holes, insert wall anchors, and secure the vanity to the wall using the provided screws. This step is crucial for stability and safety.

6. OPERATION

The Linique vanity is designed for ease of use and efficient storage.

6.1 Drawers

The vanity features two main drawers and one tip-out drawer. The main drawers operate on smooth slide rails for easy opening and closing. The tip-out drawer provides convenient access to smaller items directly below the sink.

6.2 Soft-Closing Cabinet Door

The cabinet door is equipped with soft-closing hinges, which prevent slamming and reduce noise. The integrated organizer on the inside of the door provides additional storage for bottles and smaller items.

6.3 Adjustable Shelf

The interior cabinet includes an adjustable shelf, allowing you to customize storage space to fit various items.

heights. To adjust, remove the shelf, reposition the shelf pins to the desired height, and reinsert the shelf.

7. MAINTENANCE

Proper care will ensure the longevity and appearance of your Linique vanity.

- **Cleaning the Cabinet:** Wipe the wood frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that can damage the finish. Dry immediately with a clean cloth.
- **Cleaning the Ceramic Sink:** Clean the ceramic basin with mild soap and water. For tougher stains, use a non-abrasive bathroom cleaner. Rinse thoroughly and wipe dry to prevent water spots.
- **Spills:** Wipe up any water spills on the vanity surface immediately to prevent water damage to the wood.
- **Hardware:** Periodically check all screws and connections to ensure they remain tight. Tighten if necessary.
- **Avoid Excessive Moisture:** Ensure proper ventilation in the bathroom to prevent excessive humidity, which can affect wood furniture.

8. TROUBLESHOOTING

If you encounter issues with your vanity, refer to the following common solutions:

Problem	Possible Cause	Solution
Vanity wobbles or is not level	Uneven floor; loose connections; not secured to wall	Adjust leveling feet (if present) or place shims under the base. Ensure all assembly screws are tightened. Verify the vanity is securely anchored to the wall.
Drawers do not slide smoothly	Misaligned drawer slides; debris in slides; overloaded drawer	Check that drawer slides are properly installed and aligned. Clean any dust or debris from the slides. Reduce the weight in the drawer.
Cabinet door does not close properly	Misaligned hinges; obstruction	Adjust the soft-closing hinges using a screwdriver to align the door. Ensure nothing is obstructing the door's path.
Water leaks from plumbing connections	Loose connections; improper sealant; damaged washer	Tighten all plumbing connections. Ensure proper use of plumber's tape or sealant. Check and replace any damaged washers. If leaks persist, consult a professional plumber.
