- 1. Unpack and Identify Parts:** Lay out all components on a clean, soft surface. Refer to the parts list in your manual to identify each piece.
- 2. Attach Side Rails to Headboard:** Connect the metal side rails to the headboard using the provided bolts and Allen wrench. Do not fully tighten yet.

## 4. USAGE AND OPERATION

---

This Feonase bed frame is designed for use with a Queen size mattress. No box spring is required due to the robust steel slat support system.

- **Mattress Placement:** Place your Queen size mattress directly onto the steel slats. The recommended mattress thickness is 8-12 inches.
- **Weight Capacity:** The bed frame is engineered to support up to 1000 lbs (453 kg), including the mattress and occupants. Do not exceed this limit.
- **Underbed Storage:** The frame provides 12 inches of clearance underneath, ideal for storing boxes, bins, or other items to keep your bedroom organized.
- **Noise Reduction:** The design incorporates foam padding on metal components to minimize noise and squeaking.
- **Safety Features:** The footboard features rounded edges to prevent accidental bumps. Fluorescent stripes on the legs help visibility in low light.

## 5. MAINTENANCE AND CARE

---

Proper care will extend the life and appearance of your Feonase bed frame.

- **Cleaning the Faux Leather Headboard/Footboard:** Wipe with a soft, damp cloth. For tougher stains, use a mild soap solution and immediately wipe dry. Avoid harsh chemicals or abrasive cleaners.
- **Cleaning the Metal Frame:** Wipe with a soft, dry or slightly damp cloth. Avoid abrasive cleaners that could damage the powder-coated finish.
- **Regular Inspection:** Periodically check all bolts and screws (every 3-6 months) and tighten if necessary to maintain structural integrity and prevent squeaking.
- **Avoid Excessive Moisture:** Do not expose the bed frame to excessive moisture or direct sunlight for prolonged periods, as this may affect the faux leather and metal finish.
