JIGOO J200

JIGOO J200 Mattress Vacuum Cleaner Instruction Manual

Model: J200

Brand: JIGOO

PRODUCT OVERVIEW

The JIGOO J200 Mattress Vacuum Cleaner is designed for deep cleaning of fabric surfaces such as mattresses, sofas, beds, and pillows. It combines powerful suction, high-frequency vibration, UV-C light, and heating technology to effectively remove dust, allergens, and mites.

Figure 1: JIGOO J200 Mattress Vacuum Cleaner

Key features include a 500W motor with 13Kpa suction, a smart display for monitoring dust mite levels, and a patented integrated dual-cup system for efficient filtration.

SETUP AND ASSEMBLY

1. **Unpacking:** Carefully remove all components from the packaging. Ensure all parts are present, including the main unit and filter.
2. **Filter Installation:** Before first use, and after cleaning, ensure the filter and dust cup are correctly installed. The premium HEPA filter is crucial for effective purification.
3. **Power Connection:** The J200 is a corded device. Connect the 5-meter/16ft power cord to a standard 120V electrical outlet.

UV Lamp Removes 99.9% of Mites

The UV-C LED lamp with a 253.7nm UV wavelength effortlessly eradicates mite cells and eliminates 99.9% of mites and bacteria lurking within your mattress.

Figure 2: Key features of the JIGOO J200, including dual-cup integration and smart display.

OPERATING INSTRUCTIONS

The JIGOO J200 is designed for efficient deep cleaning of various fabric surfaces.

- **Power On/Off:** Press the power button to start or stop the vacuum cleaner.
- **Suction and Vibration:** The 500W motor provides 13Kpa strong suction. High-frequency vibration (more than 12000 times/min) helps dislodge deeply embedded dust and allergens.
- **UV Light and Heating:** The 253.7nm UV light and ultrasonic speed work to effectively remove allergens. The steamless heating blow function maintains a constant temperature of 140°F (55°C) to further sanitize and dehumidify the mattress.
- **Smart Display:** The continuous detection of allergens is indicated by the smart display. A red light indicates plentiful dust mites, while a green light signifies that the area has been thoroughly cleaned.
- **Application:** This vacuum is professional for beds, couches, clothes, blankets, and any other flat fabric surfaces. It is not suitable for long velvet/long fluff carpets or hard floors.

13KPa Strong Suction

With 500W motor power and 13KPa suction, it effortlessly removes dust and mites deep in the mattress for deeper and more efficient cleaning.

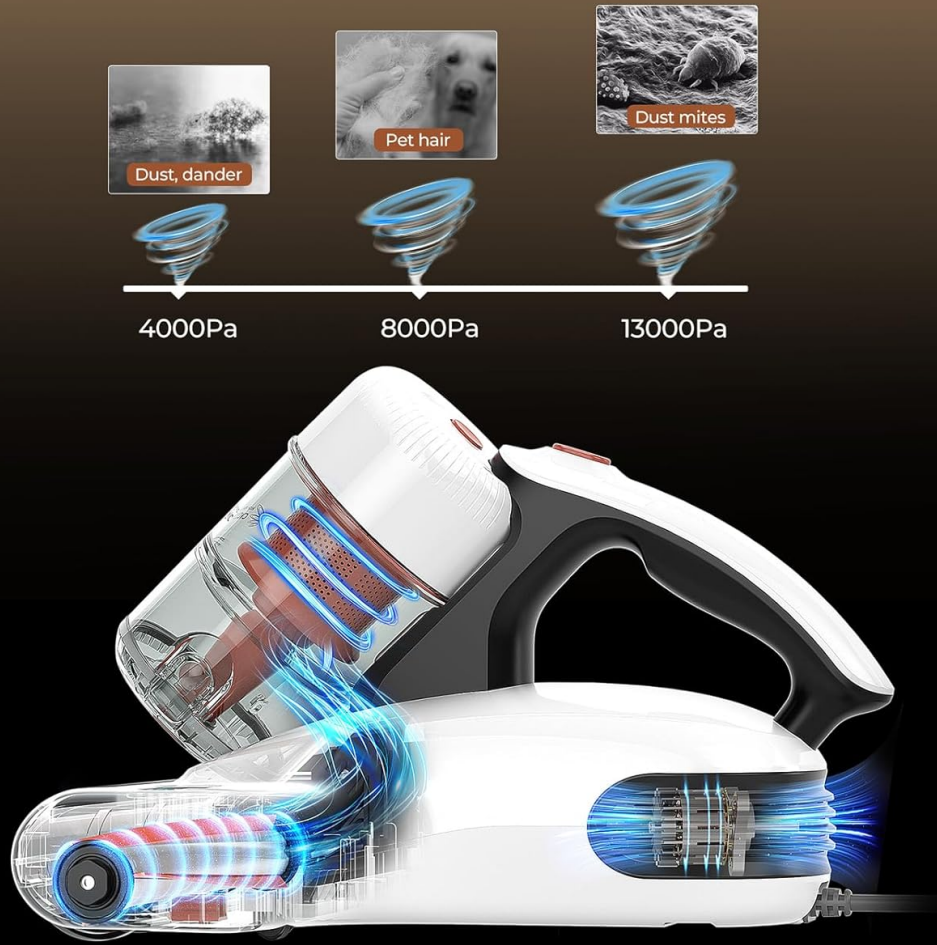

Figure 3: Illustration of 13Kpa strong suction power for effective dust and mite removal.

Smart Display, Easy Monitoring

Intelligent monitoring of dust mite levels to ensure timely and effective mattress cleaning

Figure 4: Smart display showing dust mite levels (red for plentiful, green for few).

UV Lamp Removes 99.9% of Mites

The UV-C LED lamp with a 253.7nm UV wavelength effortlessly eradicates mite cells and eliminates 99.9% of mites and bacteria lurking within your mattress.

Figure 5: UV-C LED lamp with 253.7nm UV wavelength for mite and bacteria elimination.

Figure 6: The device reaches a constant 55°C (140°F) in seconds to reduce mite activity and dehumidify.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your JIGOO J200.

- **Dust Cup Cleaning:** The patented integrated dual-cup structure separates larger debris from fine

dust, preventing filter clogging. Empty the dust cup after each use.

- **Filter Maintenance:** Clean the premium HEPA filter and ensure it is dry after each use to maintain strong suction and prevent secondary pollution.
- **Roller Brush:** The durable metal roller brushes are designed for effective agitation. Periodically check for any entangled hair or debris and clean as necessary.

Patented Integrated Dual Cups

A Lighter build, higher filtration efficiency, and larger capacity to collect allergens!

Figure 7: Diagram illustrating the patented integrated dual-cup system for efficient dust collection and filtration.

Integrated Dual Cups

- ✓ Superior filtration efficiency
- ✓ No dust accumulation or clogs
- ✓ Long-lasting, powerful suction
- ✓ Larger storage space with less weight

Single Cup

- ✗ Low filtration efficiency
- ✗ Clogged filter
- ✗ Reduced suction power
- ✗ Smaller storage space in a bulky design

Figure 8: Comparison highlighting the superior filtration efficiency and larger storage space of the integrated dual-cup design.

TROUBLESHOOTING

- **Reduced Suction:** Ensure the dust cup is empty and the filter is clean and dry. A clogged filter can significantly reduce suction power.
- **UV Light Not Activating:** The UV light is designed to activate only when the device is in contact with a surface to prevent direct exposure. Ensure the device is properly placed on the surface. Also, do not trigger both UV switches with your hands.
- **General Operation:** Always ensure the brush head, cup, and filter are installed correctly before use.

Important Safety Notes:

- Do not use the electric corded mattress vacuum anywhere with water.
- Do not slip your finger into the roller brush during operation.

SPECIFICATIONS

Feature	Detail
Brand	JIGOO
Model Name	J200
Wattage	500 watts
Maximum Suction	13Kpa
Special Features	UV Light (253.7nm), Ultrasonic, Heating (140°F / 55°C), Corded, Low Noise (75 dB)
Filter Type	Filter sponge, HEPA
Dust Cup Capacity	12 ounces
Product Dimensions	12"L x 9.88"W x 5.4"H
Item Weight	5 pounds
Cord Length	5-meter/16ft

WARRANTY AND SUPPORT

JIGOO is committed to providing excellent customer service. For any issues or inquiries, after-sales service is available 24 hours a day to provide timely solutions.

Please refer to your purchase documentation for specific warranty terms and contact information.
