# Stanley AeroLight Transit Bottle 16 oz Instruction Manual

Model: 10-10787-156

## INTRODUCTION

---

The Stanley AeroLight Transit Bottle is designed for superior thermal performance and portability. Crafted with featherweight spun-steel technology, it is 33% lighter than standard stainless steel drinkware, making it an ideal companion for commuting and on-the-go use. This vacuum-insulated bottle features a low-profile, locking, drink-through lid for leakproof carrying. This manual provides essential information for the proper use and care of your bottle.

## SETUP

---

1. **Unpack:** Carefully remove the Stanley AeroLight Transit Bottle from its packaging.
2. **Initial Cleaning:** Before first use, wash the bottle and lid thoroughly with warm, soapy water. Rinse all components completely.
3. **Familiarize Components:** Identify the main bottle body and the locking drink-through lid. The lid consists of a main cap and a flip-up drinking spout with a locking mechanism.

## OPERATING INSTRUCTIONS

---

1. **Filling the Bottle:** Unscrew the lid from the bottle. Fill the bottle with your desired beverage, ensuring not to overfill. Leave adequate space for the lid.

2. **Securing the Lid:** Screw the lid back onto the bottle tightly to ensure a leakproof seal.
3. **Locking Mechanism:** To prevent accidental spills, engage the locking mechanism on the lid. This typically involves sliding a small lever or button to the 'locked' position.
4. **Drinking:** To drink, disengage the locking mechanism and flip open the drinking spout. After drinking, close the spout and re-engage the lock for secure transport.
5. **Thermal Performance:** The vacuum-insulated double walls keep drinks hot for up to 4 hours, cold for up to 6 hours, and iced for up to 20 hours.
6. **Car Cup Holder Compatibility:** The slim profile of the 16 oz bottle is designed to fit most standard car cup holders.

## MAINTENANCE

---

1. **Cleaning:** The bottle is dishwasher safe. For best results and to prolong the life of the finish, hand washing with warm, soapy water is recommended.
2. **Lid Disassembly for Cleaning:** The lid can be disassembled for thorough cleaning. Carefully separate the flip-up spout and any removable gaskets or seals. Refer to the diagram below for guidance.
3. **Drying:** Ensure all components are completely dry before reassembling and storing to prevent odor or mildew buildup.
4. **Storage:** Store the bottle with the lid removed or slightly ajar to allow air circulation.

## TROUBLESHOOTING

- **Leakage:** If the bottle leaks, ensure the lid is screwed on tightly and the locking mechanism for the drinking spout is fully engaged. Check that all gaskets and seals are properly seated and free from damage or debris.

- **Poor Temperature Retention:** Ensure the lid is completely sealed and the drinking spout is closed and locked. Pre-heating or pre-cooling the bottle with hot or cold water for 5-10 minutes before filling can improve thermal performance.
- **Difficulty Cleaning Lid:** Disassemble the lid as described in the Maintenance section. Use a small brush to clean hard-to-reach areas.

## SPECIFICATIONS

Feature	Detail
Brand	STANLEY
Model Name	AeroLight Transit Bottle
Model Number	10-10787-156
Capacity	16 Fluid Ounces
Material	Stainless Steel
Color	Ash
Dimensions (Diameter x Height)	2.83" x 7.95"
Item Weight	0.54 Pounds (8.6 ounces)
Hot Retention	Up to 4 hours
Cold Retention	Up to 6 hours
Iced Retention	Up to 20 hours
Special Feature	Leakproof, BPA-Free
Care Instructions	Dishwasher Safe (Hand Wash Recommended)
