**TOPK E09**

# TOPK IPX8 Floating Waterproof Phone Pouch (Model E09) Instruction Manual

## INTRODUCTION

---

Thank you for choosing the TOPK IPX8 Floating Waterproof Phone Pouch. This manual provides essential information for the safe and effective use of your new product. Please read it thoroughly before use and retain it for future reference. This pouch is designed to protect your smartphone from water damage and ensure it floats, making it ideal for various water activities.

## PRODUCT FEATURES

---

- **Enhanced Waterproof Protection:** Features four-sided double airbags for strong buoyancy, preventing your phone from sinking.
- **Ultimate IPX8 Waterproof Certification:** Constructed with high-quality materials and seamless hot press technology, offering protection up to 100 feet (30 meters) deep.
- **Clear Underwater Photography:** Crafted with German Bayer materials, ensuring up to 99.99% light transmittance for clear photos and videos underwater.
- **Touch-Friendly Design:** Made from soft TPU material for smooth touchscreen access, camera function, and calls. Note: Screen sensitivity may decrease in deep water; use volume keys for photos.
- **Wide Compatibility:** Compatible with most phones up to 7 inches, including iPhone, Samsung Galaxy, Google Pixel, Motorola, LG, Huawei, OnePlus, and HTC.
- **Additional Storage:** Includes space for cards and cash.

## PACKAGE CONTENTS

- 2 x TOPK Waterproof Phone Pouches
- 2 x Snap-on Lanyards

## IMPORTANT SAFETY INFORMATION

- Always perform a waterproof test before each use, especially after prolonged storage or if the pouch has been dropped or damaged.
- Ensure the sealing clips are fully closed and secure before submerging the pouch in water.
- Avoid exposing the pouch to sharp objects or extreme temperatures, which could compromise its waterproof integrity.
- Keep the sealing area clean and free from dirt, sand, or debris.

## SETUP AND INITIAL WATERPROOF TEST

Before using the waterproof phone pouch with your device, it is crucial to perform a waterproof test to ensure its integrity.

1. **Prepare for Test:** Insert a dry tissue paper into the pouch.
2. **Seal the Pouch:** Ensure the sealing clips are securely closed. Push to open, insert the tissue, then press firmly to close.
3. **Submerge:** Immerse the sealed pouch in water for approximately 10 minutes. You can gently press on the pouch to check for air bubbles, which might indicate a leak.
4. **Check Results:** Remove the pouch from the water, dry the exterior thoroughly, and then open it to check the tissue. If the tissue is completely dry, the pouch is safe to use. If the tissue is wet, do not use the pouch and contact customer support.

## Inserting Your Phone

1. Open the sealing clips by pushing them outwards.
2. Carefully insert your smartphone into the pouch. Ensure it is centered for optimal screen access.
3. Squeeze out any excess air from the pouch before sealing.

4. Firmly press the sealing clips inwards until they click into place, ensuring a complete seal.

## OPERATING INSTRUCTIONS

### Using the Touchscreen

The soft TPU material allows for direct touchscreen interaction. You can navigate your phone, send messages, and browse as usual. For optimal performance, ensure the screen is clean and dry before placing it in the pouch.

# Screen Touch Friendly

Easily edit, take photos, and watch videos

## Taking Photos and Videos Underwater

The high light transmittance of the pouch ensures clear photo and video capture. Due to water pressure, touchscreen sensitivity may be reduced in deep water. To take photos or start/stop video recording underwater, use your phone's physical volume buttons.

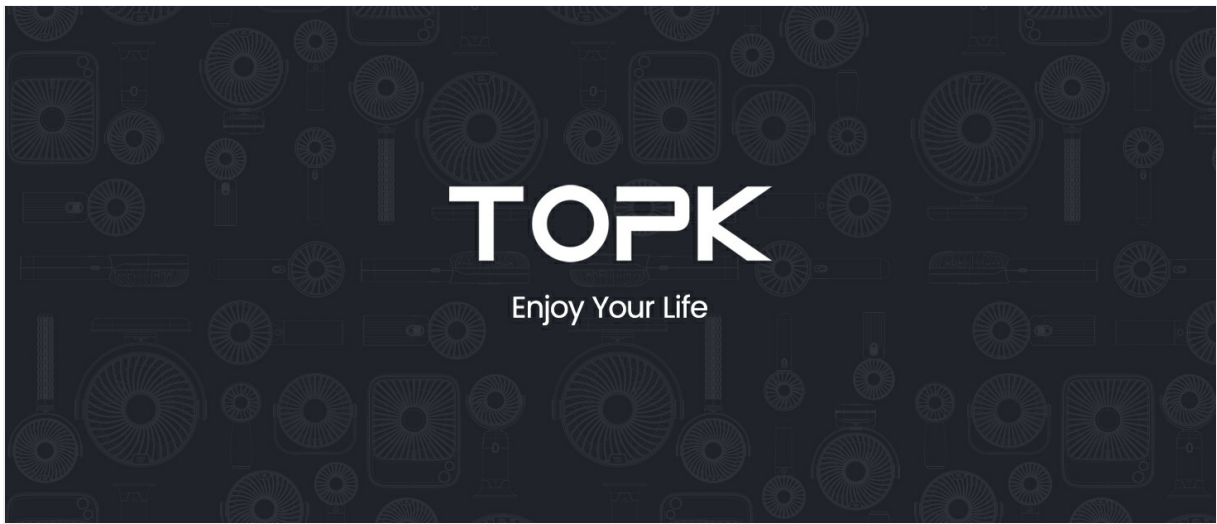

Image: Capturing clear moments with the pouch on a beach.

## **Floating Function**

The integrated four-sided double airbags provide strong buoyancy, ensuring your phone floats on the water surface if accidentally dropped. This prevents loss and makes retrieval easy.

# Floatable Waterproof Phone Pouch

Image: The pouch floating on water, secured by a lanyard.

## Using the Lanyard

Attach the snap-on lanyard to the designated loops on the pouch for convenient carrying around your neck or wrist, adding an extra layer of security against loss.

## MAINTENANCE

---

- **Cleaning:** After each use, especially in saltwater, rinse the pouch with fresh water and wipe it dry with a soft cloth.

- **Storage:** Store the pouch in a cool, dry place away from direct sunlight and sharp objects. Do not store with the sealing clips closed for extended periods to prevent material fatigue.
- **Inspection:** Regularly inspect the pouch for any signs of wear, tears, or damage to the sealing area. Discontinue use if any damage is found.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Pouch leaks during waterproof test.	Improper sealing; damaged pouch.	Ensure clips are fully closed. Inspect for damage. Do not use if damaged.
Touchscreen unresponsive underwater.	Water pressure affects capacitive touch.	Use physical volume buttons for camera functions.
Phone does not float.	Excess air not squeezed out; pouch damaged.	Ensure all air is expelled before sealing. Check for damage.
Fogging inside the pouch.	Temperature difference between phone and environment.	Ensure phone is cool before placing in pouch. Avoid extreme temperature changes.

## SPECIFICATIONS

Feature	Detail
Brand	TOPK
Model Number	E09
Water Resistance Level	IPX8 (up to 100 feet / 30 meters)
Material	Thermoplastic Polyurethane (TPU)

Feature	Detail
Screen Size Compatibility	Up to 7.0 inches
Color	Black
Additional Features	Floatable, Scratch resistant
Manufacturer	Dongguan Chenxun Electronics Co., Ltd.
