## TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

- **Cabinet Feels Unstable:** Ensure all screws are fully tightened. Verify the anti-tipping hardware is correctly installed and secured to the wall. Ensure the cabinet is on a level surface.
- **Doors Do Not Close Properly:** Check that the hinges are correctly aligned and tightened. Adjust the hinge screws if necessary to align the doors. Ensure the cabinet frame is square.
- **Difficulty During Assembly:** Re-read the specific step in the instruction manual. Ensure you are using the correct hardware for each step. Do not force parts together; if a part does not fit, re-check the orientation and instructions.
