› FUZHUI Replacement Air Purifier Filter for Midea KJ200G Series (Model FUZHUI5i80wuz7x4)

FUZHUI FUZHUI5i80wuz7x4 (Compatible with Midea KJ200G D41, KJ210G C42, C46)

FUZHUI Replacement Air Purifier Filter Instruction Manual

Model: FUZHUI5i80wuz7x4 (Compatible with Midea KJ200G D41, KJ210G C42, C46)

INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your FUZHUI Replacement Air Purifier Filter. Designed for seamless compatibility with Midea KJ200G D41, KJ210G C42, and C46 air purifiers, this high-efficiency filter is engineered to improve indoor air quality by capturing fine particles and reducing odors.

Air Filter for Midea

This air filter is suitable for Midea air purifier for KJ200G D41, for KJ210G C42, C46 composite filter element.

SETUP AND INSTALLATION

Follow these steps to replace the air filter in your compatible Midea air purifier. Ensure the air purifier is unplugged before beginning the installation process.

1. **Access the Filter Compartment:** Locate the filter access panel on your Midea air purifier. This is typically on the back or side of the unit. Refer to your air purifier's manual for specific instructions on opening the compartment.
2. **Remove the Old Filter:** Carefully remove the used filter. Note the orientation of the old filter, especially the direction of the airflow arrow, as the new filter should be installed in the same manner. Dispose of the old filter responsibly.
3. **Prepare the New Filter:** Unpack your new FUZHUI Replacement Air Purifier Filter. Identify the airflow arrow printed on the side of the filter frame.
4. **Insert the New Filter:** Slide the new filter into the compartment, ensuring the airflow arrow points in the correct direction (typically towards the interior of the air purifier). The filter should fit snugly.
5. **Close the Compartment:** Securely close the filter access panel until it clicks into place.

6. **Reset Filter Indicator (if applicable):** If your air purifier has a filter replacement indicator, follow your unit's instructions to reset it.

Video Guide: Filter Installation Example

Your browser does not support the video tag.

Video: This video provides a general example of how to install a replacement air filter. While the specific air purifier model may differ, the fundamental steps for filter replacement are often similar.

OPERATING CONSIDERATIONS

Once the new filter is installed, your air purifier can resume normal operation. The FUZHUI replacement filter works to continuously clean the air by drawing in airborne particles and odors, passing them through its multi-layer filtration system, and releasing cleaner air back into your environment.

- Ensure the air purifier is placed in an open area, away from walls or furniture that might obstruct airflow.
- For optimal performance, operate your air purifier regularly, especially in areas with higher pollution or odor sources.

MAINTENANCE

Regular filter replacement is crucial for maintaining the efficiency and effectiveness of your air purifier. The FUZHUI Replacement Air Purifier Filter is designed for long-lasting performance, but its lifespan depends on usage and air quality conditions.

- **Replacement Frequency:** It is recommended to replace the filter every 6-8 months for continued optimal performance. This interval may vary based on the air quality in your home and the frequency of air purifier use.
- **Filter Cleaning:** This filter is not washable or reusable. Attempting to clean the filter may damage the media and reduce its effectiveness. Always replace with a new filter.
- **Visual Inspection:** Periodically inspect the filter for visible signs of dirt and debris accumulation. A heavily soiled filter

indicates it's time for replacement, even if the recommended interval has not yet passed.

TROUBLESHOOTING

If you experience issues after replacing your filter, consider the following:

- **Reduced Airflow:** Ensure the filter is installed correctly and the access panel is fully closed. Check for any obstructions around the air intake or outlet of the purifier.
- **Persistent Odors:** Verify that the filter is new and correctly installed. If odors persist, the air quality in your environment might be exceptionally poor, requiring more frequent filter changes or additional air purification measures.
- **Filter Indicator Light Remains On:** If your air purifier has a filter reset button, ensure you have pressed and held it according to your air purifier's manual to reset the indicator.
- **Unusual Noises:** Check that the filter is seated properly and not causing any vibration or obstruction within the unit.

SPECIFICATIONS

Brand	FUZHUI
Model Number	FUZHUI5i80wuz7x4
Compatibility	Midea KJ200G D41, KJ210G C42, C46 Air Purifiers
Dimensions	9.4 inches x 12.6 inches (24cm x 32cm)
Filter Type	HEPA with Activated Carbon Layer
Item Weight	1.23 pounds
